Thread: [Best rat & crypter 2019](#)

Noxin - May 6, 2019, 11:22 pm

looking for the best window based rat and crypter of 2019 looking for paid ones thanks

Solipsism24 - May 6, 2019, 11:26 pm

Most of the users here offering Crypting Programs/Services are grifters/scammers who overcharge for a low-tier product.

[Cryptography and Encryption Market](#)
[Remote Administration Tools](#)
[Cryptography, Encryption, and Decryption](#)

No such thing as "best". All depends on your requirements. So, check the sale threads, read customer feedback's, and decide by yourself.

Regards.

Here's why your question of "best rat" is wildly invalid: not all rats have the same features; would you like a rat with a hVNC? WebMonitor doesn't have that. So you wouldn't get WebMonitor if it didn't have features you didn't want.

You want something that doesn't ban? Most paid rats ban but I'm sure some don't, you wouldn't buy one who's banning users though right? Do you see where I am going with this..?

There is no best rat, there's just a best rat for you. You cannot ask this question and get a stable answer, as some members will say quasar and others may say #, I've even seen people suggest nanocore (you should not use it though.) the best rat is based on preference

AnonymousOperative16 - May 7, 2019, 4:28 am

Data Protector (only high quality one on HF)
CypherIT - FUD usually

RAT

Netwire
Web Monitor

Lombaraspine - May 7, 2019, 4:57 am

Broad Crypter for sure

RAT im not to sure because all of them seem shit so far didnt try webmonitor yet

ahh sorry i agree, should've gone into more detail about my preference

im trying to use one for keylogging,hacking and just a couple thing hoping to not get banned as well

Rohan Phulari - December 5, 2019, 12:16 am

can anyone please share link of beefsoft crypter it is the best

redfarmer33 - December 6, 2019, 12:23 pm

I think Darkcomet is not really dead, no ????
