Thread: [FACEIT ban evasion \(bypass\)](#)

yxngxr1 - May 7, 2019, 7:00 am

I've been banned for ban evasion 3 times. Put on a VPN and changer motherboard but nothing have been working.

Is there a way for me to play FACEIT without getting banned?
Should i buy a new PC?

Please, someone give me an Tutorial!

HWID id will be banned by them so they can track you even if you make new account

You need to either buy a HWID changer or find a working one that is for free. (But with free HWID changers be aware, that they can contain viruses)

Don't make your cheats so evident and you may not be banned.
