Thread: [FREE 3-Day Bootcamp On How I Became Fluent In Foreign Languages](#)

TechSwiss - May 7, 2019, 10:51 am

If you want the process I used to learn to speak a language fluently with a step-by-step blueprint, leave a comment down below to let me know you're interested if you want more stuff like this in the future. I'll send you a link to a 3-day bootcamp that walks you through exactly what I did. <https://andrewh.clickfunnels.com/opt-in-page4xf7wtzf>

How many languages do you speak and how long on average do you say it takes to become fluent in a language that you currently don't speak any of? Cheers

Depends on your definition of speak but I would say 5-6 langs. And it also depends on your definition of fluent but I would say about 6 months now that I really understand the process. There are many factors to take into account obviously and I'm speaking in very big generalities.
