Thread: [Luminosity Link](#)

How was it? Why do people say KFC got raided when there is no evidence that he was arrested (That I found)? Is there an actual god damn clean crack of the latest version? Does anyone still have a download of the official download that I can attempt to crack?

Uhhh... there was dozens of threads here I have seen of people who received emails stating that their emails were subpoenaed because they purchased this. Also, you can read the articles talking about his sentencing online.

Luminosity Link wasn't that good imo, also why you keep on asking for outdated rats? ?

Just looking for information, I like to kept inside of the loop. Also, LL is NOT outdated. If you honestly think that LL of all RAT's is outdated, then you have no definition of what an outdated RAT is. RAT's from 2009 and below are outdated because they rely on windows features that don't exist, therefore making them unusable. RAT's from 2014 and above work flawlessly for me tbh. The only problem that can arise is if you are hosting 500+ bots which is ridiculous considering that botnets exist.

He was definitely raided lol.

I know a few people that had some knocks on their door, but nothing happened after that.

There are quite a bit of articles proving he did lol.

I hear since the last update of kfc that it loses all the luminosity bots.

under that update, kfc made changes and disabled all other versions of the luminosity link

I have never seen such a rat as the luminosity in the market, but it is a wonderful and powerful rat that has almost 150 features

KFC is also a good person with good support staff.

If you want a clear and original last version of the pm file I will provide you

And then I also wish that if you really get success to reverse this application and make it workable, if it is then do not forget to send me what I really appreciate you. ?

the last version when the luminosity shutdown
so do you have luminosity crack version?

duplex - May 14, 2019, 4:58 pm

Why would you want Luminosity anyway?

yes i know but in my opinion and personal experience LL is best ever
in your opinion which is best rat on market ?
i also looking for good rat which is stable
do you have any better suggestions?
