Thread: [Greyhat or blackhat money method](#)

campusminger - May 8, 2019, 6:53 am

So I have been seeing the premium seller section and all I see is gambling methods , which am not gonna try , did it once made profit and lost everything +15% more lol and half of the other methods sold are either expired or trash

Anyone who's willing to share a working method, can be grey or blackhat doesn't matter as long it's making money.

I'm not sure if someone can mentor me but I'll appreciate any options that I can get .

Thanks

So you are trying to buy a blackhat/greyhat method to get some good returns? How much effort you willing to put in and how much you offering for this.

I got an abundance of ideas that I will not use because I am not trying to go to jail or risk losing my career ?

Wolf - May 8, 2019, 7:08 am

I have one blackhat method, willing to do mentorship one on one. No initial investment required, as I'll provide you with EVERYTHING you need to start earning money. You'll get paid in btc or monero (it's up to you). The more time you spend, the more money you'll earn.

Porn - May 8, 2019, 8:23 am

@op I suggest not doing any blackhat methods, when you slip up and get caught you'll know why. Try doing some greyhat/unethical methods if you need the money that badly.

You're not gonna buy a gambling method but you just spent \$150 on a gambling method?

I guess you by yourself, can think of some black hat methods to make money. The best method to get money is to educate yourself, study, get knowledge, then you ill be able to use that knowledge to make money. There are no shortcuts in life. Does not matter how much money you spend, without knowledge it it ill be useless , what's the pointing of someone selling you their "special" method? You do not have the knowledge neither the experience to apply it, doesnt matter how much they sell you the idea for, at the end of the day you ill just have less money.

Learn how to hack websites and make some \$\$ while doing it. ?

Once you've learned how to shell servers and want to lean more towards the BH side of things you'll will be given the opportunity to become a seller on several web shell shops.

...or sell them here in the HF marketplace at your desired price, or do nothing.

The choice is yours.

You are way too dumb to make money doing anything if you buy a gambling method for \$150... Why the fuck do you need a method to tell you to gamble your money? You do realize it's all the same right? The odds don't fucking change just because you are betting .01 and increasing 10%. Come back here and cry for losing \$150 + all the money you gambled but you have no one to blame but yourself for being such an idiot. I'm sorry but I fucking hate how people are manipulated into this shit.

not really, I knew of a really blackhat method that took a lot of time to do (for like 250\$ / h)

Could you elaborate? Why do you say this? That does not make sense to me

I have some methods that can gain 5000+ in bitcoin each month, but requires at least 3+ hours of work EACH DAY.

These are extremely blackhat, in fact in my country I could serve a jail sentence of 15 years for this.

Please elaborate why does efforts and time directly effect the fact of whether it's "blackhat"

Poor choice of words?

5000+ lol that's alot , I guess if anyone who's doing a blackhat method already knows the consequences and I guess it doesn't matter if it's black or grey hat all methods require efforts and if theres no effort involved it's really not a method .

Yeah, I would still classify these methods as more than blackhat, there should be a term for things that are just heavily blackhat. Considering the amount of consequences. They require advanced good knowledge in operational security, and not telling a soul. It is difficult because you start getting all this coin, have to launder it and then all friends / family will need to have some sort of reason to understand how you are acquiring all this money suddenly.

? Jail sentence, 15 years in prison, or even anything close to that...Yeah that is scary to me. This is the reason I do not do such methods, rather my ex-blackhat mind shares with the less knowledge to choose for them self whether that is something they want to do. Exactly, it is like a bank robber, of course they know they will have high chances of being caught but when it is done with preemptive planning, accuracy, and efficiency ...history has proven it can work for some. ? But obviously takes a lottt of hard work, all the best blackhat methods take a lot of work.

Right about that ?

If there's more money involved in any method , it requires work , alottt of work . I don't think any autopilot method can generate amount like 800-1000\$ because that doesn't make sense to me

It's not work, it's cheating. And honestly if \$1000 is worth more to you than years in prison then you have bigger problems but sure go ahead.

Yes, although I am more of a grey hat you could say. My career choice is entirely whitehat, I work in cyber security and make far too much money to risk losing my career over stupid mistakes. That was more or less what I would do back when I was in my 20s

I think when he said "If the method takes effort it's not blackhat enough lol" like for example you go to school or master a coding language so you can create an innovative service or product takes many years of practice and hard work.. While on the other hand you can open tor browser copy&paste some cc's and withdraw funds in crypto without verification very easy to do.

Yeah so true, but there are definitely much more advanced methods that require less work and less knowledge, but have higher risk. You got a good point but yea I just don't see how he is measuring what is more or less blackhat than the other. I personally would determine based on the laws and jail sentences that are applied to the specific method.

Agree. What I'm doing is VERY illegal, even here in Serbia, but it's easy to do. Higher risk = higher reward.

Yes, of course. I will be a felon for life.

The first time I received probation only.

The second time (out of state) I received a 12-48 and did 12 at a minimum security camp and was

released.

0/10 wouldn't recommend.

Dumping is really profitable but it's an unrealistic lifestyle so there's no end even if you try and "limit" yourself.

Why would you? It's like having unlimited funds.
