Thread: [READY-TO-GO GTAV FiveM Server](#)

Negan - May 8, 2019, 11:37 am

Hi there!

I'm selling my old FiveM roleplay server.

The server contains around 105 scripts, including custom cars. Most of the scripts are the basics like shops, characters, gas, vehicle breakdown, jobs, etc.

Everything is customizable if you know how to script/code or have a dev hired.

The server comes with the scripts and server.cfg, not the launcher as this is drawn from my hosting. Do make sure to change some settings regarding databases, names and IP's.

SOME SCREENSHOTS:

Price will be set to 15\$ because alot of work has been put into it to make it all work together. I will give out ONE vouch to the first one wanting it. So be quick!

The database is not depended from the server. This could not be transfered as it contains alot of data of my old server.

You would need to this this anyway. You can't just import my database. It doesn't take that long, if you don't know how to get into that or don't wanna put the work in that easy section of the server, you won't ever have a succesfull server and won't know how it works. Play around with it yourself, and make it work.
