Thread: [\[Discussion & Suggestions\] The Game Section](#)

Mix - May 9, 2019, 11:31 pm

The game section seems very outdated... I wanted to see if we could suggest some things. So this thread is really to see if others would like to discuss what you would like to see in there.

I am mainly making this thread as the new hackforums game was released I thought what if we wanted to discuss everything and anything about the game. Well I have noticed a lot of threads around [The Lounge](#) With the game in mind. I thought if we could make a subforum or even a whole section dedicated to the game it would be a good start of expanding and updating the game section.

Are there any games you think that we should add to the list?

Nothing is official in here unless Omni states something. Just a heads up.

I suppose either of these subforums would already be sufficient for these discussions on the [HF Game](#)?

[Gaming](#)

I am not much a gamer any more, although I loved to play Minecraft back in the day. Sadly I would not be able to give much good suggestions as to new games to add for subforums :D

I think once the PVP aspect of the game becomes available that this going to be a good suggestion. Should be a lot of back and forth between crews competing with each other, will be fun to see.

For sure, once it becomes competitive is when the real fun starts.
