Thread: [Free XLM available on Blockchain and Coinbase](#)

webdev77 - May 10, 2019, 5:09 am

US residents from eligible states are able to collect \$50 worth of XLM on Blockchain.com by verifying their identity and an additional \$10 from Coinbase.

If you are going to claim the coins on coinbase, I'd appreciate it if you would ask me for my ref link. I cannot post it here as this is not the right forum for it. All you need to do to get the \$10 on coinbase is answer five questions (\$2/question) about XLM. They are very easy and each lesson tells you what the answer is in the description.

Bacardi Cola Lime - May 11, 2019, 3:14 am

I've been on the Coinbase waitlist for way too much time. I lost hope lol. While I got an email to collect the other promotions (BAT, Zcash, 0x), I never managed to claim the XLM. On the other hand, I managed to claim the XLM from a previous Blockchain promotion, while for this one, I've been waiting for them to verify my identity for about two weeks.

You can gain an extra \$40 via Coinbase if you refer 4 people who complete 1 question of the quiz. They must also verify their account.

Adding to this, they are also giving away 30 BATs and in the future, plan for 0rx and Zec, so make sure you join the whitelist.

Also, Whilst I attempted to use a normal static IP on a cellular network, I was not allowed to complete the XLM without a VPN connected to the country I am in.

So sometimes you may just see the "join the whitelist" or "joined whitelist" until you change to a VPN of the same country.

You may join the blockchain giveaway if you are in the supported countries

Today, I read a blog post on Coinbase which "advertised" their promotions and wrote that they are now available in more than 100 countries. While I have successfully claimed the BAT, 0x and ZEC, I'm on the XLM wait list for over a month now. I've lost faith.

It states that Australia and US are permitted elsewhere, try a VPN, what country was your IP in when you claimed the ZEC and 0x? Im on the whitelist for that and 0x

I don't use a VPN and I'm not located to either Australia or USA. My IP was, and still is in Greece, so I think I'm just unlucky at this point for not being among the first to claim it ?

Australia worked for XLM for me, but I just tried Hong Kong, US, Canada, Germany and the UK with no luck. I'll try Greece if available

Maybe if you use a VPN, you will be able to claim

Edit: Greece IP didn't work for me to claim Zec and 0x

Well I'm using a UK IP, which is where I'm from and I got my \$50 xlm.

Strange because I claimed Zec and 0x already. I will try using a VPN to see if anything happens. Thank you for the tips mate, appreciate your help.

Ah ok, I did mean for ZEC and 0x though, probably wasn't clear enough.

mrnelly - May 18, 2019, 4:53 am

Done the blockchain promotion. Got verified in 15 minutes or so. It was about a week ago, and I'm a UK resident so idk if that's any different. Weird hearing people say it took weeks for verification. My mate had similar experience to me.
