Wow, I have no words! This photography is very beautiful ?

Me\$\$iaH - June 2, 2019, 5:36 am

Not by any means a photographer but from a amateur point of view looks like there's a lot of vignette use which could be dialed down slightly especially on images taken with a lower ISO. Other than that they look pretty good

Dax - June 2, 2019, 5:51 am

I really liked the first one, It could be used for desktop wallpaper.

How do you edit them to be like this? Is it because of HQ Camera or?

Some of your photos are damn epic.. but in some, where there is some daylight, you are trying to make them dark. Your photos made by night, and edited with your darkness skills are indercidebly epic! Try to experiment with some light in your daylight pics, and you will see my full appreciation.
