Hello Hackforums,

I have collected over 500GB of material relating to technology that I wish to share.

Click [here](#) to send me a PM requesting the download link.

Many thanks

Mind sharing with me? Would be nice to see it in a Google Drive or something... don't think many users want to download 500GB just to pick through and find what they want.

Yes, of course.

The material is hosted on Google Drive so it's easily accessible.
