Thread: [Skype hack with username/email](#)

Catix - May 12, 2019, 10:11 am

Hello I'm trying to find a old friend again who went offline and deleted their email, their Skype is still up and I have their username. By any chance would someone be willing to help me find them again by seeing if they can get into their Microsoft as account (Skype)?

hidayking - May 13, 2019, 12:23 pm

Would join the request, would be interesting to figure it out.

This is doable, but not easy. Have you tried searching public databases (weleakinfo, etc)

I doubt they'd have it tbh since the person solely made the Skype to talk to me (and as such is likely under the radar)
