Thread: [UPDATED! --- EXPLOIT THE \\$50 BLOCKCHAIN GIVEAWAY --- 100% LEGAL - NO ID - NO SE](#)

Bull - May 13, 2019, 8:18 am

THIS METHOD IS UPDATED NOW AND DOES NOT REQUIRE ANY KIND OF SE ANYMORE!

(May 15, 2019 04:06 PM)Miffo Wrote: [\[CITE\]](#) Went ahead and purchased the method(s). Without trying it, it is obvious that with a little time and attention this can definitely work for anyone. Thank you for the swift deal.

(May 13, 2019 07:41 PM)Vendetta Wrote: [\[CITE\]](#) I actually forgot to post an update until "hackforumsmember69" reminded me.

The method works, i received my first \$50 which means that i'm \$25 in profit.

However as i mentioned before this can be time consuming sometimes, i do see it being realistic to get 2 give-aways per day with this but probably not more than that.

(May 13, 2019 09:33 AM)Vendetta Wrote: [\[CITE\]](#) I bought this and can confirm it works without SE.

(Jun 17, 2018 05:23 AM)bruisedwitch Wrote: [\[CITE\]](#) I'll admit, this is a pretty unique and ingenious way to game this airdrop. I'll be testing it out and trying my luck. Thanks again.

(Jun 17, 2018 05:23 AM)KGB Wrote: [\[CITE\]](#) I got a review version.

This is a kinda ingenious way of doing it, It's not something for the faint of heart the easiest way to make it work is a small investment.

It does require good S/E Skills if your not investing.

It also takes advantage of people if your not investing. This is hardly a white hat method more of a grey/blackhat method without the legality issues with blackhat.

(Jun 17, 2018 05:23 AM)_Grow_ Wrote: [\[CITE\]](#) I have just received the method. After reading this method, I have to say, that this isn't what I have expected.

This method will work, it will take some time but at the end, you will get the money.

I sold this for 50\$ at first but decided to close it and give it away due to that this is clever yes but also public techniques combined.

Then i got paid \$15 do close the giveaway thread right away before anyone received it, i accepted that but people kept PMing me for the method.

Hence why i decided to reopen the sales but for \$25 only.

I noticed a that the \$50 stellar airdrop from blockchain.info is getting pretty popular now and ofcourse, this is an airdrop worth to participate on.

The only downside is that you can only do this once, yes you can optionally invite your friends and family to join or do other hard work.

Well the hard work is over, i found a way to exploit the give away/airdrop, this won't last forever tho, when the airdrop is finished this method becomes useless until another similair airdrop starts.

That is also why i won't price this for to much.

Another reason that i'm pricing this cheap is because this method is not rocket science, it's clever tho i must admit that but if you are a long term entrepreneur with a technical background then i'm pretty confident you do know this already, you just didn't think of combining these things to exploit

the give-away.

Frequently Answered Questions

Spoiler ([Click to View](#)) Do you need to own an ID or Passport?

No, that is what the exploit is about.

Am i committing fraud?

No you are not, this is legal.

Will i need any digital photoshop skills?

No it's completely unrelated to photoshop.

Do i need investments?

No you do not however a \$10-\$15 investment per time you exploit the giveaway will speed up things.

How long does it take to perform this?

That depends, it takes a few minutes per account 7/10 times however it could take a little bit longer sometimes, not more then a couple of hours max per account tho.

The verification process before you get the \$50 is out of my reach and depends on blockchain.

Is this related to blady his method?

NOT AT ALL

Does this require social engineering?

If you invest \$10 it does not.

I already have multiple vouches and i even updated the method aswell.

Proof is impossible to give because each account is connected to another email obviously.

And transactions towards one wallet can easily be faked aswell by repeating the same transaction's for example.

However i think i'm clearly passed that stage already anyways and i'm not charging \$250 i'm only charging \$25 in case you didn't notice that.

These vouches aren't quite inspiring at all

Sword Wrote: [\[CITE\]](#) I received a vouch copy from OP on his other thread (which is identical to this one): <https://hackforums.net/showthread.php?tid=5966747>

This was my review:

First and foremost, I guess the method is possible and you probably can profit from it, but it will take a lot of time.

Imho, this is probably impossible without some investment. I would also say that it is dependent on your luck and social engineering skills.

It is not an in-depth method and more or less common sense. To be fair, I never thought of this myself.

Regardless, best of luck selling to OP.

Thought I would put this here incase OP needed it.

Sword is just hating for no good reason, simply just because he can and he does this often which also gets him banned frequently lol.

Grow states out that it works, he vouches for it, it's just that this is so simple that he didn't thought of this but could have which i also state out clearly, the method is not rocket science however it does

work.

The method is now updated aswell, it's not as time consuming anymore as it was before.

If you are talking about the comment on the first page, i think he means that his own verification process is stuck, my personal verification only took 2 hours to complete that is blockchain related not method related i suppose.

But i don't think that the issue in this method wether it's working or not is not based on the verification process because that is easy, goes smooth and there shouldn't be issues but the problem is that it can be time consuming i feel like i got lucky with this first try which took a while as well but tbh even 2 accounts per day is still \$100 daily so i'm fine with it being potentially time consuming.

I will post results when i have them.

BlackShadow - May 13, 2019, 1:06 pm

Is that method about taking pictures of stolen id cards in internet and using them for the verification

For example the verification selfie they require from you, you just simply use the photo from the id

Update 2, spend 6 more hours on this and only been able to exploit the giveaway 1 more time after the first succesfull attempt, im waiting for thst verification now.

This method is very time consuming but st least it works i guess.

I actually forgot to post an update until "hackforumsmember69" reminded me.

However as i mentioned before this can be time consuming sometimes, i do see it being realistic to get 2 give-aways per day with this but probably not more than that.

6 hours to make \$50. Not worth it at all. You can make more working a minimum wage job for 6 hours.

He made \$100 in a total of 7 hours as he said he's \$75 in profit.

With this it's pretty random, sometimes you make \$50 per 1-6 hours and other moments you have multiple x\$50 in 2 hours.
