Review of "[Earn 6 Figures Every Year by Ewhoring!](#)"

Initial Reading: In my initial viewing of this eBook, I was pleasantly surprised by the guide. The method is approximately 50 pages with photos, steps, and a wide array of directions and recommendations by the user. First and foremost, the delivery of the method is extremely easy to follow and the user offers additional mentoring if the user purchases an upgraded version. With that being said, I wouldn't say that the information is necessarily exclusive; the viability of this eBook does not come from secretive or private information, it is just the presentation of the information and some extra tidbits of information that are not public. The overarching theme of this method, though, is relatively established and used throughout the eWhoring community.

Price: This method is currently being sold for \$150 or \$400, depending on the package chosen. The content in this method is definitely useful and will help members begin to make a decent amount of income with eWhoring; although, it is definitely not worth those two prices. The user includes different packs within his guide for the buyers to use and similarly includes some tidbits of information that he personally uses to maximize his profits. Members will make their money back if they put in the time and effort by fulfilling the steps within the guide; although, I'd argue that the price should be around \$50 and \$75 respectively.

The Method: The contents of this eBook immediately delve into a presentation of different social medias that the buyer can reach the seller at for easy communication. Additionally, the guide includes a step-by-step process on how to set up yourself to successful eWhore, all the way down to the basics of choosing an alias and establishing different accounts on social media platforms. The method spans 50+ pages and goes into great detail explaining different platforms to garner traffic, social media settings to make the account seem more realistic, etc. I would like to note, though, that eWhoring is quite saturated at this point – many people still make a decent amount of income from it, but it does take a fair bit of work to actually make some good money from it. The market itself is saturated and the packs provided by the user will likely be saturated as more members purchase the method and leak the pack to their friends. Generally, the method is less of a method and more of a guide to establishing an online presence as an eWhore to consequently make some income from guys online. While the information is not necessarily exclusive or secretive, some of the more specific recommendations and tidbits of information are definitely useful and cannot be found elsewhere. I would not recommend this guide to members that already have their foot in the door with ewhoring; I would recommend it to members new to the environment who are looking to nearly guarantee the effectivity of starting to eWhore.
