Thread: [Discord Impersonator Checker \(Character Checker\)](#)

Zyger - May 13, 2019, 9:39 pm

This website allows you scan through a sequence of characters to determine if any of them are fake, i.e. characters that are not on an English keyboard.

This can come in handy since many discord impersonators exploit fake characters that appear identical to normal characters to make it seem as if they have the same discord name and tag as someone else.

The link to the website is <https://characterchecker.com>

Let me know if you have any questions or suggestions.

Use this to check for impersonators!

Huldon - June 2, 2019, 9:16 pm

I have checked few times & got same result.

'No fake characters detected.'

Do you have any sample how if result got impersonators detected?

surprised discord hasn't fixed this..

EmpressLeona - July 12, 2019, 3:36 am

Very nice, thank you :) Keeps out scammers.

JordRiddle - July 12, 2019, 3:20 pm

Thanks for this, i didnt even know people did that.

Sure, but not everyone does that

I agree.

Only problem with this service is it classes accented letters (e.g. é, ñ, â) as special characters, when in reality many foreign people have accents in their names and they're not impersonators.

Just something I'd suggest thinking about. But great job!
