Not trying to encourage you to purchase or anything. But a new version is coming soon and the price will be increasing haha. So get in now while the price is lower ;D

Its just a service you can offer when you get this bot. Its not related directly to ebay.

Ebay has a "View" count and it affects listing ranking and also increases urgency/social proof. So you can sell Views to people from this bot since you're effectively purchasing infinite views with it.

Looks really good this, I'm thinking of starting to sell on eBay so just wondering what this would do to listings etc. Thank you

Increase their rankings so you are higher than other products. I think front page products get around 45% more traffic than the products on second page. Its actually might be a higher percentage than that.

Is this views on items you are selling or just views for your store? Do you provide instructions to set up the bot?

Its very simple to use. You just put in your desired listing and click "Send". But yes I also include a free usage guide with instructions and recommendations :)

Purchased from OP and it works perfectly. It was easy to setup once downloaded and worked instantly after adding my listing and the # of views I wanted. I would recommend to anyone interested. OP also answered my questions quickly and was great!

You don't have enough posts to pm me. I don't understand what you're asking though. Do you mean will it work on your listings? Because if so yes it does.
