Thread: [VERIZON UNLIMITED DATA SIM CARDS - USA ONLY](#)

Mad Hatter - May 15, 2019, 5:19 pm

More Info: These are obtained 100% legally and you are in no danger of legal recourse. Not carded or anything like that.

These were purchased to give tablets data, but the tablets were damaged/broken.

These work with any unlocked device

These were purchased with 2 year contract less than a year ago. Each one should have at least a year of service left.

Cancellation of the contract would cost around \$400 so the SIMs should not be cancelled until the 2 years are over which is in over a year.

The price for the SIMs are \$400 nonnegotiable through BTC nonnegotiable as well. For the product it's very worth it.

Terms: These have contract for 2 years and have at least a year of service on them left, but I cannot guarantee the life of these SIM cards. I've been personally using mine for several months with no issues.

These SIM cards only have data no call or text, however, you will have a number. The number cannot be called or texted and cannot call or text, however, if you use this with an iPhone you can iMessage with the number associated with the SIM card.

The SIM card has unlimited data, but you understand that this is not actually unlimited. This is Verizon's unlimited which is something like 25gb Unlimited a month and then slowed down significantly until the next month. Then reset to 25gb Unlimited.

I will test every SIM card before sending, sending you a video showing the SIM card, confirming what the number will be, showing the SIM card's ID number in the video and showing that the data works.

I will send the SIM card with fast shipping covered by me.

After the SIM card has shipped I have no way to retrieve the SIM card. You MUST provide a valid address to ship it to as I will ship with incorrect return address and sender info to protect my identity. You will not need to sign for the package and as long as the package is delivered my responsibility is done.

All SIMs are tested prior to shipping and will work with any unlocked device. If the SIM arrives and it does not work, it is because your device is not unlocked or some other problem associated with the

buyer and not the seller. Again I will send video proof of the SIM card working before shipping.

All sales are final, I cannot offer a refund for this product. Buyer beware that I cannot guarantee that these SIMs will work for a specific amount of time. I have been using mine for months with no issue and I know that these have a 2 year contract with Verizon and they have at least another year before the contract expires.

[contract=tid]Start Contract[/contract]

Bumping this thread, bumpity bump

and still you ask \$400 for it...

Covalent - May 16, 2019, 3:19 pm

AT&T has an unlimited data plan very similar to this and it only cost 30\$ a month which is 360\$ a year. Data to deprioritization after 22GB of data is used.

SuperiorUser - May 16, 2019, 3:22 pm

yeah these are worth like 100 max tbh

zFinessed - May 18, 2019, 11:57 am

I need thisssss for the s

Churry - May 28, 2019, 11:28 am

price too high but glws mate..

Lavish Living - May 28, 2019, 11:31 am

I'll buy one for \$100 btc.

LMK

Proxies.tv - May 28, 2019, 12:48 pm

.....as I will ship with incorrect return address and sender info to protect my identity.

Thats not speaking highly of a legitimate sim card supplier.

Porn - May 28, 2019, 1:00 pm

They will be good for 2 years but at least 1 year and the sim your using has been good for few months this isnt very convincing for \$400. I'd say \$100 is fair price for this service its too sketchy unless you show proof of contract with verizon
