Thread: [Mac Banned / UUID Banned \[RSPS\]](#)

corrutediz - May 17, 2019, 8:11 am

I was banned a year ago [MAY 2018] on a RSPS and I took a long break, finally it's MAY 2019 and I'm still MAC Banned, can anyone help me in evading the ban? I've already tried using VPN, TMAC, changing hardware variables using regedit.

Finally creating new guest user evaded the ban, I was possible to login and play but I want to login using my ADMIN user account not able to figure out what the client is detecting in the admin user which it is unable to find in guest user and allows to login.

RSPS name: ROATPK
BUMP, Y'all please help a brother out

Am I missing something?
No matter what VPN, trick, w.e you use, if you use the same account that got banned, it should be virtually impossible to log in with it no matter what, right?

corrutediz - May 28, 2019, 10:26 pm

FOUND a way to bypass this :D would be willing to provide it for some \$\$

Gretar caters to the RSPS Arabic population. 80% of the players on that server are toxic Arabs. Server is truly a toxic environment and not healthy to be apart of.

I am not racist, just the players on their are assholes.
