Thread: [Spynote V6.4 source compiled.](#)

Fr33d0m - May 17, 2019, 2:05 pm

I am trying to get better reputation around here so im helping people out just by compiling interesting source codes I find just to make it easy for members who dont know how dont care to learn or are well to lazy to lol

Here is SpyNote tho hope you enjoy

Source code with a working exe - https://anonfile.com/12lbWarbnb/SpyNote_V6.4_rar

The working exe is in \SpyNote V6.4\SpyNote V6.4 Source\SpyNote V6.4\SpyNote V6.4\bin\Debug

I just didnt wanna mess with anything I didnt have to.

hybrid analysis scan -

and virus total (because for some reason it said unavailable) -

<https://www.virustotal.com/#/file/dff29505094b707b07665714b8530d7be0d379e4d2503c7b67132da99fe396e5/detection>

original source code - https://anonfile.com/EdK7Werbne/SpyNote_V6.4_Source_rar

All credits to the creators have fun ? ? ?

onlyformessage - May 26, 2019, 1:57 pm

keylogger not works

and detected by google protect

Fr33d0m - May 26, 2019, 5:01 pm

(May 26, 2019 01:57 PM)onlyformessage Wrote: [\[CITE\]](#) keylogger not works

and detected by google protect

Dude this is strictly the source compiled as I have not touched it nor will I of course it is picked up by damn near everything as for the keylogger that means it is broke inside the source code and will be patched most likely in a different update this is just a post of it compiled ?

SIMPR - May 26, 2019, 7:45 pm

(May 26, 2019 01:57 PM)onlyformessage Wrote: [\[CITE\]](#) keylogger not works

and detected by google protect

plain source code will be detected since its just a fresh compiled file. im still working on the source code so hopefully once im done it'll be able to have keylogger working on the next version or so

Skofos - May 26, 2019, 10:44 pm

just share the spynote compiled, not the source code xD

but np it nice

Fr33d0m - May 27, 2019, 8:15 am

but np it nice

I shared both so you know it is clean so you can compare the two or so you could have the option if you wanted to edit the software urself ?

JavaScriptOG - May 27, 2019, 3:24 pm

The 2 main drawbacks are that keyloggers and location manager won't work. Anyway thanks for the compiled package. At least I can also look at the source code.

Fr33d0m - May 27, 2019, 5:41 pm

No problem at all and yes they are draw backs but it's a decent android rat and can be fixed. I may be fixing this I'm not sure if I keep getting requests to I will. ?

Your all good?

Johnmoe - May 28, 2019, 9:20 am

Thanks for your kindly sharing man.

There are only very few people like you in hackforum nowadays.

All credits to the creators have fun ? ? ?

Thx mate u r genius..

I used many version , best one is V6.4

I have a source too..but don't know how to compile..

By d way , my required functions well to ,

I just want stable connection..

How to edit for that ?

Plz suggest

I am using Android 10 , Mi phone

My tg @Techomaster

Thx.. waiting for your reply...

DI?E - October 8, 2020, 6:25 pm

If someone cant compile it then they dont deserve to use it.

UndefeatedHades - October 8, 2020, 7:32 pm

It is common sense. If you cannot compile it when the directions are laid out right in front of you and you cant figure it out means you should not be compiling anything period. If you have no clue how to compile a source code when it is flat out given you the instructions then your an asshat who does not need instructions to do so from anyone else. It is clearly written how to compile it. If you cant? Then your a clear dumbass.

Plz fix it sir

How I compiled with vb.net?

I wanna stable connection with permanent offline/online keylogger function..

Plz help sir..

My tg id @Techomaster

Sorry bro ,

I means , used dracula keylogger source before 8 years , since that time I can compile in vb.net ,

My query was , code of stable connection and keylogger function..

I am not a pro coder , but not a newbie too...

I just wanna some guide to get stable connection from code...

Thx
