Thread: [\[Buying\] Shopify Website Creation](#)

the lights - May 18, 2019, 11:01 am

Hello, I'm launching a store and I need someone that knows how to design Shopify stores, not looking for just an average Shopify site builder, looking for someone that can tweak and edit code to do manual edits as well that aren't able to be done through the built in options. If you can code, and are experienced with building Shopify stores please PM me with a portfolio or links to stores you have built so I can see your work. Looking to get someone hired ASAP!

Hey, a good designer is as much important as a coder. Although I can not do much web development, if you need someone to do the graphics and help develop the overall branding of the site, I'll be more than just interested+happy in doing so.

PM me.

zealNpossession - May 19, 2019, 11:17 pm

I can do this for you. Check out my signature.

Have me updated!

LeetHost - May 25, 2019, 9:55 pm

We can do this. We're a team with dedicated designing and development team.

We can do actual modifications with your store changing core design n code.

I'm sending you PM with portfolio, please check.
