Thread: [New to nets and need help with bots](#)

gozeera - May 18, 2019, 4:29 pm

I only recently made a botnet just to see if I could. I just can't get many bots. What I need is Mirai telnet lists to load into my net and have no idea where to get them.

example of the input I need is

```
IP:PORT USERNAME:PASS  
1.1.1.1:23 USER:PASS
```

Thanks I would appreciate any help. I am just trying to get as many as I can. Not to hit websites or businesses.

mirai cant do what? mirai is a bot, if your talking about mirai's loader then you can easily change it to fit the format he's looking for.
