I would love a new signature for my profile. I prefer a dark themed animated signature, but really, it's up to you. If you can display my full username, even better! Thank you.

Boxie made me this signature that I'm wearing at the moment.

I really like what he made and it's easy to communicate with OP. I will definitely order from him in the future.

I'd love one, really into space, stars, UFOs and nebula's and stuff like that.

Boxie if you have a time. Make me a signature which involves my name one two three integrated in such a way that it appears funny.

You can choose to tell a story with it. I mean 1,2 and 3 can be played in so many ways.

Let me know if you can do this.
