Now I saw Nyan cat crypter's source code on here and figured id put the compilled version up for lazy people or onese who dont wanna compile it themselves.

Compiled Download - https://anonfile.com/M48ff0s4nb/Lime_crypter_rar

Compiled Hybrid Scan -

<https://www.hybrid-analysis.com/sample/6f2f5da2661895dac516f5cd2dbba038ed026519f51bb1b10def1c416f2f12d3/5ce0aa9c028838907c4e7ebd>

Compiled Virus Total Scan -

Source Code Download - https://anonfile.com/l680fdsdnc/Lime-Crypter-master_zip

Keep in mind its a public crypter I reccomend you buy one or make your own stub.

All credit goes to NyanCat he is an amazing coder and great member of the community.

Due to increasing question here is a how to on how to compile to make your own so you know its safe god people

1. Find the .sln file

2.open it in visual studios

3 press on start

4.next time you want to start it it will be an exe in

"Lime-RAT-master\Lime-RAT-master\Project_EXE\Debug\LimeRAT.exe"

Have a good day!!! ? ? ?

Either I am dyslexic or the domain is being blocked from my location. Can access it through a proxy or TOR.
