PRICE: \$25 - Bitcoin

[contract=tid]Start Contract[/contract]

(May 19, 2019 11:19 AM)evelution Wrote: [\[CITE\]](#) Wanted to pick this up before.. So glad vendetta picked it up. I've had a good experience dealing with him in the past, so purchased.

The method is pretty much exactly as described. No ID will be needed and not doing anything illegal.. Don't see why this shouldn't work and will follow up with results once I have a chance to give it a go!

Ev

I purchased the original exploit from "Bull" which is what got me started with exploiting the blockchain give away.

However my method is not related to exploiting peoples ID's like his was!

Unlike Bull's method this requires no ID theft, My method works faster then his old one does and has a way higher success rate aswell while his had a very low success rate.

THE METHOD DOES NOT REQUIRE ANY KIND OF ID THEFT - SE (SOCIAL ENGINEERING) OR VERIFICATION!

FAQ:

Spoiler [\(Click to View\)](#)

Do you need to own an ID or Passport?

No, that is what the exploit is about.

Am i committing fraud?

No you are not, this is legal.

Will i need any digital photoshop skills?

No it's completely unrelated to photoshop.

Do i need investments?

No you do not however a \$10-\$15 investment per time you exploit the giveaway will speed up things.

How long does it take to perform this?

That depends, it takes a few minutes per account 7/10 times however it could take a little bit longer sometimes, not more then a couple of hours max per account tho.

The verification process before you get the \$50 is out of my reach and depends on blockchain.

Is this related to Bull his method?

NO

No refunds.

It's pretty random but i can assure you that it's definitely not as time consuming as Bull's method and costs Alot less effort aswell.

I would say average 2 hours per exploit (\$50).

This is not like Bull's method no, definitely not.

But in the end you will be dealing with people yes since this is not blackhat however as i said No social engineering and not related to Bulls method either.

This is alot easier, less time consuming and works hella faster aswell.

Tho bull's method is time consuming but it sure does work

I'm not sure what exactly your offering but it would be easier for everyone , if you could give one vouch copy to a reputed member

His method worked yes, i vouched for it myself.

However it was very time consuming in my opinion.

I've already sold a few copies actually, i'm sure people will review soon aswell.

**packofmidgets** - May 19, 2019, 9:54 am

so with a \$10 investment I can be making \$20 an hour doign this method. Can you tell me how many time will I be able to do this and if it can be automated? do I have to have a verified account to do this method? what are requirements?

The method requires a \$10 investment per \$50 return.

No you don't have to verify accounts

And this can be considered to be semi autopilot already.

**jambos** - May 19, 2019, 10:24 am

bought, will push review here soon

Yes in some way since this is not blackhat.

However no social engineering of any kind required and you'll barely be talking if any talk at all.

So you say this is something different from bull's method ?

He didn't upload it, i did.

And it doesn't matter which picture i show they all look the same, it's not that one has a different  
header then the other or anything like that.

The result of my method is that specific email, it's rather an example then proof since proof can  
easily be faked in this case anyways.

I'm not saying if your method works or not , my question was if your method is working why not  
upload a brand new payment picture instead of uploading same exact picture with same date and  
time that he has on His thread , in short it would be nice if you could upload recent payment proof.

**Wick.** - May 19, 2019, 11:48 am

I figured this would be easier, the picture is the same after all and i just needed to copy the link of  
the image which saved time and effort.

And he didn't post that on his thread, i did post it.

Haha no ofcourse not, this is semi autopilot and has definitely nothing to do with your friends or family or similair.

You also don't have to do the verification tho.

Good question Mario.

Can I make fresh new accounts to do this method with or do they need to be legit real id kind of accounts?

Also what is the payout time? Like how long do I have to wait on average to get the funds? Do you have any proof of an actual payout other than the email?

Yes you can, you don't need to do any verification work, read my post towards Mario his question.

Payout time depends on blockchain not this method but usually within 1 day or a few hours.

Check the email on my thread, it's not a payout they just credit the XLM to your blockchain account.

**packofmidgets** - May 19, 2019, 3:33 pm

you know I have looked into this XLM thing when it first came out and in fact I was the first person to tell you all about it on HF as far as I know. I have asked just about every question I can think of but the only thing I can think to ask now is what I am thinking the method is. You said it doesnt involve SE not really but you do need to speak with ppl. So I am thinking this is a method where you ask someone to make the account for you or maybe just do the verification process? like a friend or family? If not then the only thing I can think of is you use a third party site that takes care of registration and thats why you would need \$10 investment maybe for them to proccess the entry automatically? is it anything to do with any of that ?

**Wick.** - May 19, 2019, 3:46 pm

This.

Could kinda describe the method.

What's the catch? You're getting unlimited crypto but you're sharing the method potentially leading to a patch being developed.

I too would like to a recent screenshot. Odd its like pulling teeth to get you to share one.

You can do this unlimited.  
You are not buying ID Cards no that would not work.  
It depends on Blockchain how long it takes before you get the XLM.

It's pretty obvious this is paying people on Freelance, microworkers, or any similar site that involves people looking for jobs. I've been doing it over the last week and it's super tedious because you get people who either don't speak English or aren't comfortable uploading their ID to blockchain.

No it's not tbh.  
and you also won't walk into issues of non english people or uncomfortable people or anything like that.

You should stop making assumptions and ask questions instead like others do.
