Numbers are used once per service. If you used WhatsApp no one else is able to access the number for WhatsApp :)

Its the HF 'copy' version of JuicySMS. When you want to deposit on the HF version you need a contract. This is required according to the HF Terms.

Does it work for localbitcoin?

L0RE - May 25, 2019, 7:54 am

I thought id give this a shot by using it on one of my steam accounts. so far it has work just as expected and I can honestly say that this is my go-to service. One thing i would recommend however is that it should have a variety of numbers available from different countries. Not only would

that boost the services' popularity, but would also help the developer make a little more money.
Thank you for the service man :)

Different countries are simply not possible right now but I will do my best to make it possible.

Currently numbers are indeed rotating and can only be used for 1 SMS. However, I will update that in the future!
