Thread: [RAGNAROK Crypter | C# | USG | Unique Storage Method | FUD | Bypass ESET/AVIRA](#)

Tostig - May 21, 2019, 1:12 am

Most recent scan:

Full features list:

- Custom Icon
- Custom RunPE
- Crypts Native and .NET Assemblies
- Unique Storage Method (Bypass Avira)
- Inject into RegASM, VBC, or Self
- Startup/Persistence Module
- Custom Process Name
- Custom RegistryKey/Folder Name
- ExecutionDelay
- AntiVM/Sandbox
- Fake MessageBox
- Custom MessageBox Buttons
- Custom MessageBox Icon
- Custom Assembly
- Clone Assembly
- File Pumper
- Icon Changer (change icon of Crypted output)
- Polymorphic Encryption
- Output Obfuscation

I CHOOSE WHO IS ABLE TO BUY THIS PRODUCT. YOU MUST MESSAGE ME AND I'LL DECIDE IF I WANT YOU USING THIS CRYPTER. ONLY THEN WILL A CONTRACT BE STARTED. I ACCEPT BTC, LTC, AND ETH. THIS PRODUCT IS SLOTTED, MEANING ONLY A CERTAIN NUMBER OF LICENSES WILL BE AVAILABLE. THERE ARE CURRENTLY 41/50 LICENSES AVAILABLE.

For those who have opinions on the pricing: the pricing is quite generous for what you're getting. This isn't some pasted garbage that you may encounter should you peruse the Cryptography marketplace. This is written to exact specifications and with as little bullshit as possible. I'm easy to deal with support-wise and have no problem assisting customers. I don't swear at or verbally abuse my customers or potential customers. You get what you pay for.

runtime run4me scan results bro ?

Tostig - May 21, 2019, 2:24 am

(May 21, 2019 01:39 AM)Astraviruzz Wrote: [\[CITE\]](#) runtime run4me scan results bro ?
Working on it. My transaction is taking a bit to confirm... ?

CasePaste - May 21, 2019, 2:34 am

giving out vouch copy for a review ?

SIM-3132187 - May 21, 2019, 2:50 am

The gui reminds me some crypters sell on hf ? GLWS ?

Tostig - May 21, 2019, 2:53 am

(May 21, 2019 02:50 AM)Frenchy Wrote: [\[CITE\]](#) The gui reminds me some crypters sell on hf ?
GLWS ?

The NetSeal theme, no matter how old, will never be irrelevant here. It has tons of controls and looks really nice with the way you can add color accents and whatnot. The visual aspect of this software has nothing to do with what's going on behind the curtains, I assure you.

Above is a WebMonitor scan, cloned MegaSync assembly, injecting into RegASM, custom icon, and file pump. Different tools are giving me different detection rates, I'll see what I can get my hands on to test with next.

Flacon - May 21, 2019, 4:36 pm

my brother this looks amazing best of luck with sales please note run4me checks are very unreliable try and use dyncheck with full internet online to see best possible results best of luck once again great work

Tostig - May 21, 2019, 6:06 pm

(May 21, 2019 04:36 PM)Flacon Wrote: [\[CITE\]](#) my brother this looks amazing best of luck with sales please note run4me checks are very unreliable try and use dyncheck with full internet online to see best possible results best of luck once again great work
Thanks chief.

Currently trying to find optimal settings for least detections! So far, BitDefender and ESET are able to be bypassed on runtime by a big file pump, and Avira is hit or miss. Some crypts are FUD Runtime, some are 2/20 Runtime. I'll keep messing about.

Edit: I'm finding consistent FUD rates with a particular set of settings. All is well!

Fulya Donmez - May 22, 2019, 1:37 am

Good to see another good product release on HF. Can you tell us what is coded in and output stub size?

Flacon - May 22, 2019, 2:48 am

it says it on his thread c sharp and stub sizes can range from 1-5mb i believe if not mistaken

Tostig - May 22, 2019, 6:14 am

(May 22, 2019 01:37 AM)Fulya Donmez Wrote: [\[CITE\]](#) Good to see another good product release on HF. Can you tell us what is coded in and output stub size?
C# and typically 700kb at the lowest.

Fulya Donmez - May 22, 2019, 8:57 am

(May 22, 2019 02:48 AM)Flacon Wrote: [\[CITE\]](#) it says it on his thread c sharp and stub sizes can range from 1-5mb i believe if not mistaken
Wow nice.. Any vouch copy available?

Tostig - May 22, 2019, 7:08 pm

(May 22, 2019 08:57 AM)Fulya Donmez Wrote: [\[CITE\]](#) Wow nice.. Any vouch copy available?
If the right person comes along, sure. Otherwise, no vouch copy will be given out. Handing out executables willy nilly will result in this getting cracked and ending up on Nulled.io a lot faster than I want it to.

Sara.ellem - May 23, 2019, 12:44 am

Trash.. and the price looks like you sell an airplane..

Trust me if you just do a little search on uncle google you will crypt your own shit and without having to pay

Ren And Stimpy - May 23, 2019, 8:41 am

Contacted via PM!

Waiting on response.

Thank you mate.

I love the owner of Run4me lol, but the result is not reliable.. I recommend you to use dyncheck or heavenScan(never used but seems cool).

bawsyfella12 - May 25, 2019, 11:10 am

looks Hq from here. ild love to get can u pm me buy link

campusminger - May 25, 2019, 11:13 am

will you be offering private stub as well or just shared stub?

mogulboy - May 25, 2019, 3:22 pm

Is there anywhere I can get secured cloud storage that isn't owned by USA corporation?

Tostig - May 25, 2019, 4:25 pm

(May 25, 2019 11:13 AM)campusminger Wrote: [\[CITE\]](#) will you be offering private stub as well or just shared stub?

Private stubs are planned, but I'm unsure how to price them. I think a Private stub would be lifetime only. I'll see what I can do.

Additionally, there is a C++/ASM stub on the way which will make your file run on ANY Windows operating system, so long as the file you are encrypting is also native. That builder/stub will only be available privately.

JustNothing - May 26, 2019, 7:47 am

Your title says that it bypass avira?

Anyways glws.

sifekama - May 26, 2019, 10:23 am

idk no any real scan runtime on dyncheck Run4Me is nothing i don't really Trust this and no video GLWS

Tostig - May 26, 2019, 1:38 pm

(May 26, 2019 07:47 AM)Adderall. Wrote: [\[CITE\]](#) Your title says that it bypass avira?

Anyways glws.

It does. There are builds that bypass and there are builds that do not, but the biggest factor in bypassing Avira w/ Ragnarok is VersionInfo and the Language of the IconGroup resource.

CasaDelFake - May 26, 2019, 7:51 pm

Check you Pm Tostig, I want to buy RAGNAROK Crypter :)

sifekama - May 27, 2019, 3:09 pm

can you please provide xampp or else i'm looking for be a real client if you proof yourself i can buy

private stub or other shit ... add me on jabber or pm your jabber for talking

Tostig - May 27, 2019, 8:44 pm

Working on new stub, current detections. C++/ASM Stub is on the way.

sifekama - May 27, 2019, 9:00 pm

bro don't be low quality user you ignore my MSG and trouble yourself on theader i ask for a dyncheck real scan run4me are not real scan

Tostig - May 30, 2019, 12:33 am

From June 1st to June 15th I will be away from this project due to an obligation to the United States Government. I will (hopefully) be available via HF PM and Discord, but I will not be able to work on this project for that time. I have prepared a number of FUD stubs to be released during this timeframe.

UniverseX2 - May 30, 2019, 6:03 pm

the second to last line on polymorphic encryption i think u are trying to call the usg polymorphic but that's kinda confusing lol

GreatPirate - May 31, 2019, 4:07 am

pls add binder to the builder !

sifekama - June 13, 2019, 9:20 am

so project is dead ? i see

Tostig - June 15, 2019, 10:47 am

(Jun 13, 2019 09:20 AM)sifekama Wrote: [\[CITE\]](#) so project is dead ? i see

It's not dead. I was away for two weeks on a government obligation, where I had no access to a computer where I could update this software.

I'm back tomorrow.

kauf - June 16, 2019, 10:27 am

does this work on both native and .net? which folder/s are your STARTUP and is STARTUP Hidden?

Tostig - June 16, 2019, 2:38 pm

(Jun 16, 2019 10:27 AM)kauf Wrote: [\[CITE\]](#) does this work on both native and .net? which folder/s are your STARTUP and is STARTUP Hidden?

Works on both Native and .Net files, and the startup folder can be renamed by the user.

Additionally, I got tired of sending out new executables every time there was a new stub, so I added a feature that automatically loads the newest available stub for your use! You won't have to re-download Ragnarok for ReFUDs anymore!

Redwolf3221 - June 16, 2019, 3:34 pm

Seems Interessting will check this out in a few days :)

H4x10r - June 17, 2019, 2:45 am

how about runtime videos :-)?
interested !

Redwolf3221 - June 20, 2019, 1:17 pm

High Quality in all Points. this dude is knowing what he do

i also really like that there only 50 people allowed to use this

at all what i want to say is if you can be one of the 50 you should do it at any time!

sifekama - June 24, 2019, 5:49 am

i'm waiting you for reply i opened contract

Tostig - June 24, 2019, 11:49 am

Working on a new builder for Ragnarok, with improved USG and features like:

- Disable Windows Defender
- Task Killer

sifekama - June 24, 2019, 3:50 pm

iv paid check contract please

magichack3r - June 25, 2019, 2:57 pm

I want to acquire it, send a private message.

th3Mystery - June 26, 2019, 8:01 am

I sent you a contract accept and let me pay

magichack3r - June 27, 2019, 2:33 pm

New stubs are pushed on average every 18 hours. It could very well be the software you're crypting but I have also been away for a long time lately dealing with personal business. Its possible I need to rewrite a decent portion of Ragnarok as someone deliberately distributed samples.

AncientWolf - June 27, 2019, 3:38 pm

Tried many crypters on HF for the past few years till today

RAGNAROK is very well written and the stub is actually 20-30kb

Which is great because it's actually very effective and bypasses almost every Anti Virus compared to other crypters with 300-500kb stub that doesn't bypass most major AV's

Good Job Tostig, and good luck everyone.

kauf - July 2, 2019, 10:35 am

(Jun 27, 2019 02:33 PM)magichack3r Wrote: [\[CITE\]](#) 10/26

[Scan results](#)

use icon from 210kb to 300kb this should solve this detection

Tostig - July 3, 2019, 11:31 am

Today I'm completely rewriting the stub for Ragnarok. While I was gone, someone thought it'd be entertaining to submit samples to ESET without me finding out.

th3Mistery - July 5, 2019, 4:07 am

It seems like crypter down. how do you chat with customers ?

Tostig - July 15, 2019, 11:54 am

For 4 hours last night the crypter was down and unable to retrieve the latest stub from my host. That issue has been fixed and Ragnarok is back up.

chalaji080 - July 20, 2019, 8:19 am

Is this crypter compatible with netwire?

travisci - July 26, 2019, 2:03 pm

This seems like a HQ product, posting here to come back later

Tostig - July 28, 2019, 5:11 pm

Stub is now being auto-generated and updated approximately every 8 hours.

Anonz8 - July 29, 2019, 11:40 pm

(Jul 28, 2019 05:11 PM)Tostig Wrote: [\[CITE\]](#) Stub is now being auto-generated and updated approximately every 8 hours.

stub is auto-fudding istelf?

Fulya Donmez - July 31, 2019, 3:08 pm

(Jul 29, 2019 11:40 PM)Anonz8 Wrote: [\[CITE\]](#) stub is auto-fudding istelf?

Auto generated he never said auto fudding. Do you need a brain reset?

kauf - August 2, 2019, 1:28 am

this is becoming upsetting, it never FUD neither getting 1 detection. complained but still nothing done

Tostig - August 2, 2019, 11:48 am

(Aug 2, 2019 01:28 AM)kauf Wrote: [\[CITE\]](#) this is becoming upsetting, it never FUD neither getting 1 detection. complained but still nothing done

One detection is hardly anything to complain about, seeing as the detection could be a result of the software you're crypting, your settings, etc. Many crypters have a dozen detections after three to four days, and Ragnarok has had one detection for a week or two, at least in your case.

log dot zip - August 2, 2019, 12:31 pm

I have no affiliation with OP. I have never spoken to him. I have never had any contact with him. But please don't complain about ONE detection.

If you want something that makes your product pass scantime (so people can download it), then get

this. I can't speak for runtime, but maybe creator can shine some light on that.

Anyways, I'm sorry these people don't understand that "FUD" is practically impossible, because all anti-viruses are paranoid to the point where even legit signed apps.

Tostig - August 2, 2019, 12:50 pm

(Aug 2, 2019 12:31 PM)0xdead Wrote: [\[CITE\]](#) I have no affiliation with OP. I have never spoken to him. I have never had any contact with him. But please don't complain about ONE detection.

Anyways, I'm sorry these people don't understand that "FUD" is practically impossible, because all anti-viruses are paranoid to the point where even legit signed apps.

If all people want is to remove some scantime detections, they're welcome to go ahead and spend an hour or two rewriting the stub to an existing scantime crypter.

Runtime results vary. I'll be honest, WD is giving me the most trouble right now! I dedicate time every day to releasing a different stub and the way I get my results is exactly as follows:

Clone assembly from any installer, i.e. spotify setup or something of that nature

Download high res PNG and use either Convertlco.com or lcoFX to make an icon with all stored resolutions

Pump at least 500kb, most success with 4-5mb.

Delay at least 20s

Startup sometimes adds detections depending on the target software, sometimes use startup of RAT, etc.

After file is crypted, open in ResHacker and change assembly language to 1033 (english, US)

Never had more than 2 detections unless I'm testing something archaic like DarkComet. I do all my tests with Imminent Monitor/Orcus outputs.

kauf - August 2, 2019, 12:59 pm

give a proof you have only 1 detection in your crypting. you skids just post without knowing what you speak of. if it was 1 detection i won't complain seems you not getting the edge of my word correctly before typing

this is using installer assembly with 295kb ICON and pumping with 5mb

<https://avcheck.net/id/hLPDm1Yu8sLx>

this is without pump and using installer assembly with 295kb ICON

<https://avcheck.net/id/CnoLsxzrDtj3>

Anonz8 - August 3, 2019, 9:07 pm

Is this cryper just a wrapper ' Ecrypted shell, with raw RAT binary within' and once program is ran, raw RAT gets ran in memoery, which gets detected?

Or does it actually encrypt the file. Hope that makes sense

Tostig - August 4, 2019, 10:18 am

(Aug 2, 2019 12:59 PM)kauf Wrote: [\[CITE\]](#) what the heck, i was talking about 3 detection and what i said i was "NOT EVEN 1 DETECTION" do you even check what you selling? for the past couples of days i purchase i never had 1 detection than this 3 upward.

<https://avcheck.net/id/CnoLsxzrDtj3>

Then the settings I use for what I'm crypting are giving different results on the software you're crypting... it's fairly simple to understand.

If my recommended settings are worse in your case, then use what works best for you...?
