Thread: [I'm really liking how all these usernames are now freed up](#)

debian - May 21, 2019, 11:56 am

Here are some interesting 4 character or more usernames I found that are available (I just got debian because I think it's dope)

computer
password
hacker
javascript
1234
shit
leet
boob

and so many more. ?

Just took lonely, good luck hunting usernames guys!

Zexi - May 21, 2019, 12:31 pm

Imagine being the guy who thought he was OG "Shit"on HF.

I'll probably never change my username but if i did would do it for a 3 letter name.

Imao. I can definitely see some users here getting "shit" as their username.

You need to be ub3r to get 3 letter names, no? Or can you do it with l33t?

Not really sure never tried changing my username. I think it's uB3R only.

Saint - May 21, 2019, 12:46 pm

Nice haha, congrats on the name. I got my OG name after many years on the last prune.

flavoral - May 21, 2019, 12:49 pm

Let's if anyone will be able to sell their HF username lol

lowforflow - May 21, 2019, 1:07 pm

how is that possible ahaha

Omni just did a huge prune of 250k old, inactive accounts so now all of those usernames are up for grabs. Check out the news thread here: <https://hackforums.net/showthread.php?tid=5972078>

You just log in with your new username or you can also log in with the email that you used to sign up. I don't think you can sign in with your old username after you change it

actually, your username is not even 3 letters, it's all special characters

l337 - May 21, 2019, 1:21 pm

I have never seen site that allows space in username :p but i can confirm that i can login with space in username :p

Which OS do you use on a daily basis? I really like Kali, but I only use it when I need to use one of the many useful programs it has. Otherwise I'll use Debian 7 Desktop

Hah, that's a dope name and matching siggy. (No pun intended)

I feel like I gotta pick the perfect name because in the future all these OG names will no longer be available.

Nah, it's even included in the trust scan. I think if it was against the rules Omni would've banned special chars altogether.

Win10 on daily basis, but lately I've been doing some security CTFs and Kali sure comes in handy for that.

Yeah, when I realized Stoner wasn't taken I had to change into it. It's probably the most fitting name I can think of besides Autism lol.

Ah man, for some reason I've never ever been able to use Windows 10 - even back when I used Windows at all, I couldn't do windows 10.

Did you make your username and siggy to that because you only use the computer when you're upside down? My great uncle could only use the typewriter upside down too.

Basically, I let all the blood flow to my head so I can barely read all the shitposts on HF. I do flip my desktop though so I can function normally, it's just to pass out after some time because all of the blood is pumping to my head. I do this so my mom doesn't have to be sad because I'm gaming all day.

I don't have any friends at school

That's a really smart strategy. I'm guessing that with all that extra blood up in your brain your brain probably works way faster and you can solve problems much quicker
