Thread: [What is the best option for free HTTP RAT](#)

Bronson - May 21, 2019, 6:13 pm

I need a free http web based rat but I can't seem to find anything that is not out dated or free

I remember when I was back in high school and I wanted so badly to get started with learning about this, I was saving for a week to be able to purchase what was necessary. It's not a bad option to invest a little bit, since it would be an investment in yourself with goal of expanding your knowledge.

I don't want to invest in a project that is short lived, I been a member here for nearly ten years I still have vast knowledge just abit out of touch
