Thread: [\[FREE\] I'll help you turn your old/used/empty BTC/LTC/DOGE addresses into free money!](#)

debian - May 21, 2019, 8:31 pm

If you have any Bitcoin / Litecoin / Dogecoin addresses that had any money in them on May 12th, 2014 then that account likely also has 4.6 CLAMs in it, which at the moment are worth about \$15.

You can check your BTC/LTC/DOGE's CLAM balance at <https://just-dice.com> - go there and click on Chat then type in:

Code /dig *BTC/LTC/DOGE_ADDRESS* and it will tell you the CLAM balance.

If you have any, you can redeem it by downloading CLAM client and importing the privkey/wallet

Also, for old Bitcoin accounts, make sure to check <https://findmycoins.ninja> to check the Bitcoin Fork balance of each address.

If you make any \$\$, I would love a tip :)

CLAM address: xJKXjhoyvxoDDPCSkELZn1NPrtzB9x4f

BTC address: 1B1tqpsLiDUikq7Wqy7ZuPVE9HZfaUnRh2

Cheers!

Nope, that's why I said I'll help you and why you could just not give me anything either way (though I ask you to provide a tip if it works)

PM me your old address(es) and I'll let you know

I'd like to check this out, I have some old, pre-2015 addresses.

Do they have to be from before 2015 or can addresses from 2015 work as well?

I PMed you.

I've already been able to help two users get about a total of \$150 in free coin and I may be able to help you too! Send me a PM and I'll give you the method.

Cheers!

Of course you don't have to say that you got any coin but I would really appreciate it if you could send me a small cut :)

Cheers!

Please send me the method in a PM bro.
