Thread: [Make \\$500+ Monthly - Semi-Autopilot - 100% Success - 2 Vouch Copies](#)

I will keep this nice and simple. This method is based on scalability and involves the use of emulators. On average, each "session" takes 5 minutes and earns you \$2-\$5 a month depending on your country(USA is \$5). Now, if you spend 50 minutes, you will be able to make 100 sessions allowing you to make \$300-\$500 every month. Of course, you can also be spending 50 minutes every day until you have 1000 accounts(or all at once of course if you don't get tired of constantly creating sessions), scaling your earning all the way to \$3000-\$5000.

Here is somewhat of a catch: You must withdraw the money from each session manually. While this may not seem like much, it can add up. Withdrawing from a single sessions takes 15 seconds on average, multiply that by 100 and that is 23 minutes spent and then multiply that by 1000 for huge scaling and you are now spending 4.1 hours every month doing the same action. Of course, this seems so trivial but just putting this out there for the less patient people. You will also need to have an 18+ PayPal(preferably real in case anything happens) and you will also be getting paid in PayPal.

As for the legitimacy of the method, I am willing to give two vouch copies to reputable members who are willing to actually try the method for a month(this is when you can usually withdraw), if you are requesting a vouch copy please be aware of the requirements: a decent PC, and the patience and time to set up this method

Doing the math, you are spending 50 minutes(100 sessions) + 23 minutes(withdrawing money from 100 sessions, you can do 1000 sessions if you don't have a life) which ends up being 1 hour and 13 minutes per month to make \$300-\$500. Not bad. Please request a vouch copy in the comments(don't bother if you are not reputable)

The price will be \$80 in BTC/ETH/XLM, 10 copies to prevent possible saturation.

This is not a bullshit method that makes you "\$200 a day", all of that is complete fake shit, this is a reasonable passive income method that is autopilot.
