Whats that special character thats like this - but it doesnt show up in text?

BTC - May 27, 2019, 6:47 pm

^^ Is that the character you are talking about? It's so hidden that I always get confused in some games where people abuse it ?

No not that one. It looks like this - but it doesnt show up in text when i would use it. I had it saved in a text file on my old pc.

"?"

Is this it?

Long dash or em dash. There is a hotkey for it. It's Alt + (-) for Word or Alt + 0151 for others.

This is my favorite character:

It doesn't show up anywhere when you enter it. You just don't type anything if you want to type it
