Hey guys,

I'm interested in PureVPN, but I'm not sure if it is worth it money.  
Do you have any experiences with it? Is it fast and safe?

Thanks in advance guys! :)

Hello,

I do not recommend this! slow, instable!

I used it does work, but if you wanna stream something like movies or playing games online which require high data usage better go with other options.

Want a free trial to dollarvpn? You can check us out and check our reviews

Hm ok. But they have a lot of servers around the world. Are they all that slow? What about the security? They say, they don't log anything.

Do you think it is good enough for surfing anonymously through the internet and download some stuff?

PureVPN is absolutely trash. Would never trust them, would never use them. I'd recommend just buying a cheap VPS and installing OpenVPN on it, I would NEVER EVER use a VPN provider. But that's just me. Plus it would be cheaper :P

Used PureVPN for years and has always worked a treat whether is was gaming or streaming. The client is stable and provides better speeds than other VPN's I've used.

Hm ok so you made a good experience.

It is difficult, because opinions differ so much. Maybe I'll give it a try. Will then report.

Thanks to all

It probably depends on your location, some work better and are faster in Europe/USA

One guy who used it got arrested by alphabet soup agencies. From the company releasing logs. I can't post links with my current post count so you can Google it.

Yes, this is true. The concerning part is PureVPN being based in Pakistan (they falsely claim Hong Kong) and not having to cooperate with US legal requests in the first place, oh, and they lied about keeping logs. Gaditek Inc./PureVPN also sets up fake VPN review companies where PureVPN is always ranked #1. I would never use PureVPN.
