Thread: [Ripple Partial Payment](#)

ANONDARKSTAR - May 29, 2019, 3:40 am

Hi HF,

Any idea how to make partial payments for Ripple. Any wallets supporting that option or any method? anyone knows?

Thanks!

ShinyThings - May 29, 2019, 3:43 am

What do you mean partial payment?

Lante - May 29, 2019, 3:49 am

Can't answer OP's question but I can answer this:

Source: <https://developers.ripple.com/partial-payments.html>

Code In the default case, the Amount field of a Payment transaction in the XRP Ledger specifies the exact amount to deliver, after charging for exchange rates and transfer fees. The "Partial Payment" flag (tfPartialPayment) allows a payment to succeed by reducing the amount received instead of increasing the amount sent. Partial payments are useful for returning payments without incurring additional costs to oneself.

I read this one earlier, but couldn't figure out where the field for inputs are, where do i get these options which wallets, that is what is bugging me....

thanks
