@Pulse - May 29, 2019, 11:58 am

Might want to move this to the hosting services section.

:D :D Any other smell ripper here or is just me?!

Handsome Hawk - May 29, 2019, 12:55 pm

leaving comment to coming back for hosting service reviews

GLWS

GLWS

Thanks you and i hope when next you come back you will be convinced!! ?

r0073t - May 29, 2019, 2:34 pm

Botnets are not working good on bulletproof host's lul.. They are best on offshore host's, dedicated servers, and i never seen so low prices on bullet proof ;)

Show some proof of "your real work".

The user LameNick is selling bulletproof vps' on this forum for similar prices. If a server is bulletproof or not has nothing to do with if the nets are working good on the server or not...

?
