Thread: [Any way to Jailbreak IOS 12.2 or Newer? Or downgrade?](#)

SIM-3498481 - May 30, 2019, 11:02 am

I have an Iphone 8 running ios 12.2. I was wondering if it were possible to jailbreak it on its current version, the new version, or if it were possible to downgrade it to jailbreak it on an earlier version. Thanks!

I've read that there are online jailbreaking methods such as [Cydia Cloud | Cydia Download on all iOS version \(No Jailbreak Needed\)](#)

But it does not jailbreak ios but simply download Cydia.

12.4 is now jailbreakable. Update it asap.

I just used Chimera on 12.2. Works great!

If I were you, I'd save blobs for 12.2 and update to 12.4 (save blobs as well and then jailbreak it)
