Thread: [How do I hack an Animal Jam account? Or find out somebody's password via hash?](#)

hardkore144 - May 30, 2019, 8:22 pm

Hi.. o.o Not sure if this is where I post questions Lol, but I'm wondering how to hack into an Animal Jam account? Or use brute force to somehow figure out somebody's password. Not sure how the replies on this work, or how these forums really work at all tbh. Soo I guess reply to this if you can help me ? XD

They have their own captchas so you would have to make a proxy supported script if you would want to bruteforce accounts. You can look at the networks tab in the chrome developer tools to see what their login request looks like.
