I bought a vps from them around 2-3 weeks ago, it's working fine so far. It has never stopped and it's working pretty fast plus the net speed is insane

Do you allow phishing content?

You aren't allowed to advertise discord servers, read HF's rules.

The support option is unavailable on your website. I paid for my second month, now it says it is "terminated" under status.

I'm pretty sure thats what most of the people who sells rdp's do, so obvious because they allow cracking/checking accounts.

Usually the owners of other sites just advertise on the top and everyone presses it and think's they'll randomly become pro crackers because they

bought a RDP. ?
