Obviously paid cheats, I've looked at Iniuria since everyone in the reddit CSGOhack sub recommends it but it seems too fishy that so many people are shilling it. Aimware has been detected way too many times.

I would recommend VER\$ACE however I doubt you have the swag required to gain access to it, so unfortunately you may end up having to purchase the second best cheat on the market, perfectaim. #ad

It's a public paste, you don't need anything to gain access to it ?

Imagine selling and advertsing a pay2paste.
