First I would like to thank Soul for this opportunity reviewing this guide. I would have to state, this is a well written out and laid out guide. There are 14 pages total step by step guide to successfully running through the process to start making money. Although it's one big guide to one major way to earn an income, it's well typed thought out to make it very user friendly from start to finish. There is a bonus a section included also help users a second way of completely understand and trying a different way around the process inside. I can say from my opinion that price valued at this guide is very firm and a reasonable amount. Would I ever try this guide out to make an income? I sort do this anyway, but in a different standpoint so I would say this work 99.8% of the time if you know what your doing. Would I recommend this to someone? I sure would without no hesitation, I think some users to look at making long term money from guides like these. I have said everything, I have

thought on the guide, I think you should add a part two an additional sequence to this guide with multiple platforms.

Seriously, interested, but you don't say much about what this is. Any more details? Selling, gambling, cpa..? Any more info you can give would be helpful.

Thanks,

Hello HF,

Shout out to [Soul](#) for the opportunity to review this guide.

I will be reviewing this guide free of all bias. Items being reviewed are held to the accepted standard for [Market](#) eBooks (methods or guides).
This is a review and should be treated as such.

Alrighty then, let's get this review on the books:

This guide consists of 13 pages and has a decent readability factor. Without giving away details of the specific content I will say that this eBook is laid out in your stereotypical format found here. That being said; there isn't anything exclusive included and to be blunt this is more of a guide to started a small business.

I notice one of the bullet points in the OP says "AutoPilot"; however, that is undoubtedly misleading given the labor involved in managing a "business" and maintaining clientele. In the practice of owning a business, very very few get by with no initial investment so that is a bit far fetched to say no investment is required. I would say it is recommended at the absolute least.

Now that I got the harsher critiques out of the way...

I enjoyed the personalization the OP incorporated. Reading the guide was simple and comprehensive so definitely no complaints on that front.

All things considered, this guide contains useful information. I just believe that there are quite a few discrepancies between the OP and the actual guide itself.

Thank you again [Soul](#) for the copy and thank you everyone else for taking the time to read this review!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
