PhotonRAT - Official Reveal Trailer

Hey guys! As some may know I am currently developing an all new RAT built off of Vanilla. If you do not know, this RAT is called PhotonRAT. Photon will be much better as a whole with a focus on speed, ease of use, and stability. I have put together an official reveal trailer for Photon in its early development stages. Please PM if you are interested in closed alpha once it is ready for it. As a last note, for any C# nerds, I will be starting to post on the C# area for help, so those wanting to contribute, that's where to look! Enjoy! ?

I am not interested in Android RATS. I'll leave that struggle to the Java developers lol

CryptoWare - July 6, 2019, 10:04 pm

I'm interested in closed alpha once it is ready pm me with the details

Hi, really interested in seeing / trying your new tool. Really love what you did with VanillaRAT, so am sure this will be cool. Please let me know when there is some code to test

Thanks

I mean, I guess I could use Xamarin, but what really is the point of Android RAT's anyway? There isn't really a non-malicious use for them, and they aren't persistent at all.

manlikejamal123 - July 28, 2019, 11:49 am

good luck bro, we appreciate your efforts.

Coby Pleyer - July 29, 2019, 5:34 am

will this pass Windows defender?

wingers - July 30, 2019, 6:24 am

any idea of when there will be a version for us to look at / test??

Regulus - August 25, 2019, 10:50 am

This looks really promising to be honest.

Looking forward to it :)

CrasherWhomLee - August 26, 2019, 2:11 pm

it's so cool . :) i like open source .

Great to see new projects in development.

The only problem you might run into is C# being very detectable, very early in launch deployment to public.

this looks interesting man i may get this once releases

Vlyrez - September 17, 2021, 10:36 am

I would like to tet your rat, will it be paid or free?

hazbot77 - September 18, 2021, 5:16 pm

OP hasn't been online in over a year, this is unlikely to ever be released.
