I am thinking about buying kon-boot. But it is so expensive. Is it a good one to buy? You know what i mean? xD

It's a legit piece of software. \$25 for personal use is well worth the convenience. Even \$75 for commercial use is a good deal.

to be able to bypass online password, we have to buy 2 in 1... \$140. for mac and windows. Is it legal to buy together?
