Thread: [Subway Any 6-Inch \\$2.99 \(USE UNLIMITED TIMES\)](#)

Proxsky - June 6, 2019, 9:58 am

Subway has a coupon where you get any 6-inch for \$2.99 for registering your phone number. So basically you can only use one per number. I noticed that the coupon page is literally just a simple page with a timer. I made an android app that is almost an exact copy of the deals page so I can use it as many times as I want. I tried it yesterday with my friends, and it worked lol. We used it like 5 times yesterday.

Just sharing it with you guys.

pay attention to you by downloading its application probably a virus (check old threads and answers)

Proxsky - June 6, 2019, 2:50 pm

How is it a virus? It's just a Android App that's published on the play store. It doesn't even ask for any permissions.

You're the developer and the only review. No thank you.

cgi-bin Laden - June 8, 2019, 12:56 am

lol u cant just make a webpage and make it fullscreen

Proxsky - June 8, 2019, 3:35 pm

If the timer working and running, they will not accept the coupon. I used it today and the lady asked, let me see the timer lol. I'm sure you could replicate it using webpage, but I have no limited experience in web. I've used this 8 times so far. That's $8 \times 3 = \$24$ savings. 6-Inch are \$6, save \$3 every time I use this fake coupon app.
