can someone show me how to download dark comet?

if you don't even know how to download darkcomet how you're thinking to set it up, crypt the file, spread it, manage your clients etc etc etc?

I think that's not a thing for you

Use a VirtualBox

Get a vpn

download a bittorrent

Go on tor

Find the hidden wiki

find the .onion site for #

copy the magnet url

Place it on your browser url (not tor)

hit enter and it should download.

FOR EDUCATIONAL PURPOSES MATE ? am not responsible for what you do.

STAY SAFE.

Cheers

Firrst get a bit torrent client right..

Get tor

hidden wiki
find the .onion site for the famous torrenting site. NB: 'bay'
Search dark Comet
instead of directly clicking the magnet url COPY IT
Then paste it on your normal browser
this should begin the download.

Haven't even heard the dark comet name brought up in a while. OP you have no idea what you're doing so please stop before it goes to far. If you really want to attempt to rat use something newer and easier to obtain
