START EARNING ON AUTOPILOT NOW!

[Buy with a Contract](#)

I will keep this short and clear for everyone, no fancy design either.

This is not a method, this is a bot!

A bot that maintains your discord server and automatically takes care of all payments and delivery of upgrades.

This bot is your next autopilot success, you can start selling spotify upgrades on complete autopilot with this and because it's autopilot completely you can still focus on your other sources of income while this beauty earns you cash automatically, even when you are sleeping or enjoying the summer at the swimming pool!

This can be your new autopilot income!

Main Features:

Key Generator

Multi-country support

Sends account's address to validate the invite (on dms)

Doesn't show the customer's e-mail on chat

Saves logs for owner(s) to a specific channel

3 types of keys (single use, multiple uses, and x activations per day)

If this list doesn't make sense for you then don't worry, it all comes down to one thing and that is thing is cash!

Pricing:

All required files + Guide = \$65

All required files + Guide + Support + Updates = \$85

Nobody interested in this?

spidum - June 9, 2019, 9:07 pm

Does the bot run on a VPS?

Fiber - June 9, 2019, 10:43 pm

Interested a few concerns though for instance what kind of payment gateway does the bot work with PayPal? Crypto's? Bank Transfer? Does this work with other platforms other than Discord?

Is there a ban rate probability using this if at all?

Is this a complied software or is it something I can modify myself?

Linux/Windows both?

Spoiler [\(Click to View\)](#) Might want to give the thread a quick once over for the odd spelling or two

People will purchase keys from you that they can use on the bot. I accepted Paypal/btc/eth using auto-buy sites. You can accept any payment form you wish. Currently only on Discord, never been banned for it, worst thing that can happen is Discord deleting the server the bot is in, depending on the way you get the family owners (if that way breaks Discord's TOS or not). It is wrtten in JS, you're able to edit it if you wish. Windows only.
