Hello!

I've spent a lot of time researching about RDP Cracking, and because I saw that some people were interested in this topic I decided to write down my method.

It is not using DuBrute or any of those shitty crackers. You will need Linux for this.

[contract=tid]Start Contract Here[/contract]

The Bonus Method is a way of cracking a lot faster and with more success. It comes with a unique tool that you won't find anywhere else.

Relaunch Discount of 50%
Use Coupon Code: "RELAUNCH"

BASIC PACK [\$29.99] \$14.99
PREMIUM PACK [\$39.99] \$19.99

After the first 3 sales price will increase!

Can i have a vouch copy? I have a lot of experience in this area and can leave a detailed review!

Timo - June 18, 2019, 2:05 pm

Im not intrested in cracking, but used to do it a lot.

I can take a vouch copy if you want to, won't be using it after testing it for the vouch so won't make you lose a potential customer.

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service.

Pronouncers's Review for "[\[RELAUNCH\] Advanced RDP Cracking | Tools Included | No DuBrute](#)" by [AlphaTurtle](#)

Before starting i'd like to say an enormous thanks to AlphaTurtle for allowing the appraiser's team to review his product. We take the highest care to review products from the perspective of a buyer. Upon purchasing, you will receive a folder containing numerous resources. Within the PDF guide itself, we received the method for cracking, numerous tools for cracking along with tools for finding IP ranges to crack. The first thing I would like to mention is that this guide may be a bit too much work for a lot of users as the guide heavily relies upon the user installing a Linux based system to use the tools. This may be an issue for those who don't have system resources to create virtual machines; it would be nice to see a tutorial included on how to create a bootable USB with the Linux distribution of the guides choice. The guide covers the same steps when it comes towards using NMAP, but where the guide flourishes are with the other tools a lot of which I have never come across or used, which is always lovely. Honestly, there are not too many negative points to say when it comes to this guide, everything is explained including tips and tricks on what to do if you manage to break your Linux machine or face an error. The second I received this guide AlphaTurtle has been spot on with support, I do hope he is like this with all his customers.

FINAL THOUGHTS

My final thought on this is that the pricing is a bit high, but only by a few dollars, this guide is not for beginners in my opinion which seems to be the perspective AlphaTurtle has taken by naming it Advanced cracking, it's not the basic DuBrute NMAP. There are a few things I would like tweaks such as ebook design along with windows alternatives and mac alternatives to software as a lot of users may want an RDP to be able to run windows. Maybe some tips and tricks on how to keep rdp's for longer, like creating a hidden user. Overall I would say this book is worth a purchase, I learnt a few things, and I think that you will too. I ran a test run and within 24 hours cracked 9 RDP's which is not bad in all honesty I was also using a small password list.

Appraisers aren't responsible for any scamming, or issues you have with the products. You should

always contact the OP rather than us, we received a copy of the product to review, and we found that it had no issues at the time. Products and people can always change, and we cannot help that.

That cracked RDP will be password changeable ?
how long those RDP will last?
what will be the specs of those RDP?
