Thread: [Export as PDF bug](#)

S2K - June 8, 2019, 8:23 am

When I export a thread as a PDF, the usernames with special characters don't appear. For example, my username isn't shown in the PDF

like this: <https://prnt.sc/nz9es6>
[^mentioned thread](#)

Wick. - June 8, 2019, 8:25 am

I didn't know HF had a feature to export threads in PDF.

Probably because of the PDF font / FPDF issue. Another reason special characters in usernames is stupid.

Omniscient - June 8, 2019, 2:19 pm

Maybe you can change your username. We're not fixing this "bug".
