Thread: [\[Source + Release\] Vanilla Rat v1.7 - Advanced Rat Coded In C# - FINAL UPDATE!](#)

VelvetCoding - June 8, 2019, 1:11 pm

Full Description:

Vanilla Rat is a remote administration tool coded in C# for Windows. It is stable, simplistic, and designed for ease of use. Vanilla Rat uses the Telepathy TCP networking library, Costura.Fody DLL embedding library, and dnlib module reading and writing library.

Features:

- Remote Desktop Viewer (With remote click)
- File Browser (Including downloading, drag and drop uploading, and file opening)
- Process Manager
- Computer Information
- Hardware Usage Information (CPU usage, disk usage, available ram)
- Message Box Sender
- Text To Speech
- Screen Locker
- Live Keylogger (Also shows current window)
- Website Opener
- Application Permission Raiser (Normal -> Admin)
- Clipboard Text (Copied text)
- Chat (Does not allow for client to close form)
- Audio Recorder (Microphone)
- Process Killer (Task manager, etc.)
- Remote Shell
- Startup
- Security Blacklist (Drag client into list if you don't want connection. Press del. key on client to remove from list)

Update Notes:

Hey guys! This is the final update of VanillaRAT. I'm sure those who requested new features will be quite upset at this news, I'm upset too! Before I clear up that problem, I should tell you what has been added in the final update. I have added a security black list to block unwanted IP's (just drag client into list, or hit the del. key on the blocked client to remove from list). I have also added a remote click feature on the remote desktop. Not many features, but I do need to wrap this project up! I invite all to keep working on this project, and make modifications, i'm sure it has some potential. Now, to clear up the features I would have added. I have since abandoned this project to work on a new, much faster, and stable RAT called PhotonRAT. This project will be built off of all the lessons I have learned from Vanilla. I would like to make a last thank you to all the people who have helped me with this project. I can not stress the amount of knowledge I have gained from it! Don't worry, feature suggestors, though! I will be implementing most of what has been suggested in Photon. Again, thank you, hack forums! ?

PhotonRAT Release Trailer:

[Video: <https://youtu.be/NyFVHPOC998>]

Demo:

I'm sorry Vanilla. I will include a tribute towards you in Photon ;(

Goldmouth - June 8, 2019, 2:03 pm

Sweet deal, nice to see open source projects

Cooooool - June 8, 2019, 2:27 pm

Great job dude! Really loving that reveal trailer.

suckx - June 8, 2019, 6:51 pm

Nice work you are doing,

Question, do you train? And how much?

VelvetCoding - June 8, 2019, 6:58 pm

(Jun 8, 2019 06:51 PM)suckx Wrote: [\[CITE\]](#) Nice work you are doing,

Question, do you train? And how much?

Do I train what? C#? If C#, I am a student, you should find someone else to do that for you lol.

Brofist - June 8, 2019, 7:09 pm

Great RAT, actually use it occasionally. Thanks and keep up the good work!

Silkroad - June 8, 2019, 7:11 pm

Looks pretty good, nice job mate.

ninfaaruna - June 9, 2019, 12:33 am

interesante propuesta ?

suckx - June 10, 2019, 9:28 am

(Jun 8, 2019 06:58 PM)VelvetCoding Wrote: [\[CITE\]](#) Do I train what? C#? If C#, I am a student, you should find someone else to do that for you lol.

C# and C/C++ on writing such a RAT. PM me which email to contact you and how much per a few hours of class.

Thankx.

theevster101 - June 10, 2019, 1:50 pm

nice tool. should add reverse proxy or can someone link me to program that does that silently. am using quasar for reverse proxy but i need a better rat thx

richiss972 - June 23, 2019, 8:42 am

Looks pretty good, nice job

Ramboll - June 26, 2019, 6:18 am

why you never add reverse proxy ?

Gust - June 26, 2019, 7:25 am

(Jun 26, 2019 06:18 AM)Ramboll Wrote: [\[CITE\]](#) why you never add reverse proxy ?

Probably, cause it's one of the hardest thing to implement in a RAT and OP is moving on with other

projects.

ifemonums28 - *June 27, 2019, 7:46 am*

what about email clients (outlook, thunderbird)

DinuReddy - *July 3, 2019, 2:14 pm*

what about the stability ?

client stay persistence ?

hendrawan - *July 4, 2019, 9:16 am*

(Jun 8, 2019 07:09 PM)Brofist Wrote: [\[CITE\]](#) Great RAT, actually use it occasionally. Thanks and keep up the good work!

Mantap terimakasih telah memberikan informasi

Selfpwned - *July 4, 2019, 9:24 am*

Looks great, can't wait to see the new version!

starkov0022 - *July 4, 2019, 9:35 am*

How to get it?

I want to try it too

Jaden1345555 - *July 8, 2019, 11:40 pm*

This looks epic bro! Can't wait!

Holuwadrizzy440 - *July 11, 2019, 5:16 pm*

I need this rat please?can u help me set it up?

Harmani - *July 13, 2019, 5:49 pm*

Please how do I get this tool?

ShopExploitx - *July 17, 2019, 8:01 pm*

Looks dope! Hope the recode will be even better.

stickybudd - July 18, 2019, 3:46 am

Where do we find the files please?

Selfpwned - July 18, 2019, 12:38 pm

(Jul 17, 2019 08:01 PM)ShopExploitZ Wrote: [\[CITE\]](#) Looks dope! Hope the recode will be even better.

Hello, I have a question.

I do not understand why you quoted the full thread.

Can you explain it to me?

Thanks! ?

akrmzaki - July 19, 2019, 5:43 am

umm, i can't seem to find download link for this, looks pretty good and i wanna test it

BrainDD-00 - July 19, 2019, 7:04 am

thanks mate, is this rat able to bypass UAC ?

VelvetCoding - July 19, 2019, 10:21 am

(Jul 19, 2019 07:04 AM)BrainDD-00 Wrote: [\[CITE\]](#) thanks mate, is this rat able to bypass UAC ?

Completely forgot about that! I will be sure to put that in my to-do list. I would like to note (and I will say this to any other message that regards malicious use), this program is being built purely for educational purposes, and I will not be taking responsibility for anything anyone does. I would

discourage malicious use with this program. ?

BrainDD-00 - July 19, 2019, 11:01 am

thanks a lot man, you are the best
and of course i just want to control my own other computers with it

Vuln - July 19, 2019, 1:10 pm

Nice release, good luck with Photon. Will it be free as well?

(Jul 19, 2019 10:21 AM)VelvetCoding Wrote: [\[CITE\]](#) I would like to note (and I will say this to any other message that regards malicious use), this program is being built purely for educational purposes, and I will not be taking responsibility for anything anyone does. I hope you know what you're getting yourself into. Your little disclaimer doesn't mean shit.

eEelad - July 19, 2019, 7:43 pm

looks so amazing my friend ;)

peterzoro - July 20, 2019, 12:23 am

Please build on top of .net framework 2.0 so that it can run on Windows 7 as well. and BTW can we run Vanilla on Windows 7?

Judasz - July 20, 2019, 1:01 am

legit :ok_hand: i hope it can rat any pc

Cooooool - July 20, 2019, 11:59 am

(Jul 20, 2019 12:23 AM)peterzoro Wrote: [\[CITE\]](#) Please build on top of .net framework 2.0 so that it can run on Windows 7 as well. and BTW can we run Vanilla on Windows 7?

Windows 7 comes with .NET 4.0, please don't request things that already exist.

Vuln - July 20, 2019, 12:17 pm

(Jul 20, 2019 11:59 AM)Cooooool Wrote: [\[CITE\]](#) Windows 7 comes with .NET 4.0, please don't request things that already exist.

It only comes with 3.5, 4.x comes after SP 1.

Cooooool - July 20, 2019, 12:21 pm

(Jul 20, 2019 12:17 PM)Vuln Wrote: [\[CITE\]](#) It only comes with 3.5, 4.x comes after SP 1.

I see, thanks for enlightening me.

Welp, I don't understand why people would want to infect machines older than Windows 7 SP 1 but he can do what he wants I guess.

Vuln - July 20, 2019, 12:47 pm

(Jul 20, 2019 12:21 PM)Cooooool Wrote: [\[CITE\]](#) I see, thanks for enlightening me.

Welp, I don't understand why people would want to infect machines older than Windows 7 SP 1 but he can do what he wants I guess.

You're welcome.

Apart from a few people who are specifically targeting Win 7 (and maybe some Win Server version), there is indeed no reason at all to want 2.0.

But a lot of people incorrectly assume that a lower framework version is a smaller dependency.

billhenrybh - August 5, 2019, 2:19 am

Please when is the PhotonRAT going to be release?

jojodo - August 5, 2019, 2:37 am

Please keep updated ! I want it too. :)

ast009 - August 5, 2019, 1:21 pm

Where we can download it?

VelvetCoding - August 11, 2019, 10:31 am

Due to the school season starting up, PhotonRAT's development will be quite slow. This is also not my main project right now, so it is not top priority. I have also decided that PhotonRAT will not release on Hack Forums, as the community (apart from a few members) is mostly unhelpful, and toxic, or they are 10 year old's just looking for another tool to show their friends. If you would like to PM me to get a link to the Photon community (which I just made) where I will be updating progress, please do so and I will take a look at your profile.

00x1AC - August 11, 2019, 3:04 pm

Hi

Please send me the link.

Thanks

Claw - August 11, 2019, 6:15 pm

Well done bro, keep it up.

kulem07 - August 25, 2019, 10:47 am

why you never add reverse proxy ?

Terabyteonpeen - August 30, 2019, 9:17 am

This looks really good! Good work and thank you!

wilmerarturo - September 2, 2019, 5:05 pm

hola queiro una rat la vendes

Cooooool - September 2, 2019, 7:03 pm

(Aug 25, 2019 10:47 AM)kulem07 Wrote: [\[CITE\]](#) why you never add reverse proxy ?
He's not releasing PhotonRAT on here because of people like you.

You are stupid. Incredibly stupid at that, and I'm glad you acknowledge that fact.

RATs are programs or software developed by developers, these developers can "add" to the RATs by "adding" features. This expands upon the capabilities that was originally possible within the RAT.

McJefferson - October 16, 2019, 3:43 pm

Hm... That's quite contradictory to your other statement but whatever.

Reverse proxy is using the client machine as a proxy, making it so the server has the same network status and IP as the client machine. This enables people to run a service such as an account running the Remote Desktop Protocol, or RDP. It also enables people to bypass IP verification for certain websites.
