Thread: [\[NEW CRYPTOCURRENCY\] No Investment and free on the phone mining](#)

Lusifer_ - June 9, 2019, 6:45 am

Hello everyone ! :)

Today I present to you a project that is beginning to grow significantly: "Pi Network".

Pi Network is an application available on the PlayStore / AppStore (so secure), which allows you to choose a new crypto with your phone.

She is currently in beta, which means that you simulate the mining.

At the end of the party, keep your wallet.

We are already 60k users, 100k the earnings will be divided by two so better to hurry.

Refer your friends to win even more.

On the application enter the code "Lusifer" for longer access to registration (by invitation only) and earn 50% of the value of your profits.

In short, you will make money without taking a dime out of your pocket.

So, enjoy the app before the cake is too well known.

Good luck to all and good mining ! :)

add me.... my name on pi is icivy

Oxycodone - June 12, 2019, 3:35 pm

Its at \$0.007077 USD currently,

I mean any profit is profit i guess.

My only annoyance is that you have to manually restart it every 24 hour or something to stop bots, idk how that works. Stupid if you ask me, I might un-install, who knows?

I believe this was posted here before. It looks to me like a mobile RAT disguised as a "Mobile mining app". Fuck with this at your own risk of peril.
