I assume these can't be applied to an existing AWS account that already has redeemed an EDU code? perhaps with some social engineering?

INCREDIBLE - June 9, 2019, 9:24 am

Unless you did not use the same event code.

#2 What is the Stack number for an AWS code? Is one code one-time only? Or can it be applied multiple times?

For a given Credit Name/Event ID, a limited number of codes can be applied to one AWS account. The limited number is the stack number. There are many possibilities for the stack number, such as 1x, 2x, 4x, 5x. So please check this stack number carefully before purchase. Also please note that the code is one-time only. You need different codes to reach the stack limitation. And the stack limitation is a life limitation. If the stack limitation is reached, you cannot use that Credit Name/Event ID codes in the future months too.

#3 How many codes can I apply to one AWS account? What is Credit Name/Event ID?

Credit Name is same with Event ID. They are just different names. Credit Name is the key to code purchase. For one AWS account, it can apply codes: Credit Name1 x stack for Credit Name1 + Credit Name2 x stack for Credit Name2 + Credit Name3 x stack for Credit Name +..., if you can find endless Credit Name codes, you can apply credit endlessly too.

#4 How to check the AWS Credit name of the AWS account?

On AWS console, click upper right username, "My Account", "Credits". Here you can the current codes credit name list. However, please note that The AWS "Credits" part refresh every month. And the credit name stack is for lifetime. So please keep a full credit name list every time you applied a new code. You need to keep your own code credit name record to avoid credit name stack issue.
