Thread: [\[Twitch.tv\] Live Viewer Bot -- Multi-threaded, Multi-Country -- Source Code](#)

redpanda139 - June 9, 2019, 11:51 am

Hi all,

I spent about 50 hours creating a new Twitch.tv live viewer bot in Python 3.7. This was more of a test than trying to create something sellable, but over time I realized people would find this valuable so I turned it into a very usable script. The bot is written from scratch and using the fastest possible method that I've found.

Details about the bot:

The bot is capable of delivering up to ~20k viewers concurrently on a single VPS machine (~40\$/month on DigitalOcean) with a specific residential proxy provider (75\$/month). I have fine tuned the script to run be extremely efficient with system resources so that the cheapest VPS on the market can deliver great results. You can also run it on your personal computer if you like since it uses proxies. All viewers are proxy IPs meaning the viewers do not show up in the user viewer list but can easily boost a channel up 5k+ for a sustained amount of time (forever). The bot uses proxies that rotate so the chance of getting caught is close to none. The bot uses a proxy provider that has many countries available so you can pass in a list of countries or default to any country via command line.

Video demonstration:

Created a video for anyone to view of the bot getting 20k viewers: <https://vimeo.com/342643847>
PW is my HF username without the numbers.

The bot has the following command line options:

-- channel: twitch.tv channel
-- viewers: # of live viewers desired

(there are more options that I can reveal once you buy the script, but it basically allows fine tuning of the performance and behavior of the script to what you want).

Twitch does not allow viewer bots like this on the platform so I am merely selling the script and how to set it up, I do not endorse using this or creating a business off of this script. I am not responsible for what you do with the script.

That being said, I am looking to sell my work and a setup guide that I wrote to help you get started. This will include:

- Live viewer python script (viewers.py) (Python 3.7+) (latest Python for performance reasons)
- requirements.txt for Python dependencies
- Bash script (setup.sh) to install all dependencies for an Ubuntu 19.04 machine
- Answer any questions you might have about the code (why things are coded the way they are, etc) solving any issues you run into until its setup (easy setup)

I am looking for serious buyers only. I prefer people who are looking to make a business AND know how to code python (need to know: concurrency, networking, i/o, event loops), since the script can easily be built upon to scale to even more viewers. I do not plan on selling to people who aren't technical enough to handle it, since that will require even more support from my side.

Willing to run a vouch live viewer test on a channel for a Ub3r user or highly trusted marketplace user only, since this is a fresh HF account. Not looking to provide a vouch copy for someone's personal gain for their own channel... please don't contact me for free viewers. After the vouch is done, they can report back the results and we can go from there. Please post in the thread and PM me for a vouch test opportunity and we can target a channel with a specific number of viewers.

I am looking for \$1000 in BTC \$400 that can go through escrow for the bundle above. Selling limited number of copies or if someone wants to take it for themselves forever, I am willing to sell only once for a higher price.

That being said it has worked 100% recently but Twitch does move fast, there is no guarantee this will work forever but the way the viewing technique is done, is mimicking the behavior of a real live viewer so I would bet this technique is never going to go away.

[contract=tid]Start Contract[/contract]

prunedaccount_81895 - June 9, 2019, 12:52 pm

Pm'in you about this and regarding the requirements.

redpanda139 - June 9, 2019, 12:57 pm

(Jun 9, 2019 12:52 PM)Lone Ranger Wrote: [\[CITE\]](#) Pm'in you about this and regarding the requirements.

Replied. Still looking for an uber or trusted marketplace member for vouch viewbot test!

Gucciii - June 9, 2019, 1:45 pm

I would be willing to test this out and leave a vouch, let me know

prunedaccount_81895 - June 9, 2019, 1:55 pm

User showed me a preview on a random channel that I chose. He delivered 995 viewers from the 1k he promised which worked overall great tool! Use middleman recommended but the bot seems to be working. GLWS

redpanda139 - June 9, 2019, 1:57 pm

Thanks! Yep, showed a demo and it worked fine.

redpanda139 - June 10, 2019, 4:47 pm

Bump! Still looking for interested parties. Willing to demo to serious candidates.

redpanda139 - June 14, 2019, 8:52 am

Bump! Still looking for people.

doon - June 14, 2019, 10:53 am

Can you show me proof of giving someone 20k viewers?

redpanda139 - June 15, 2019, 1:53 pm

(Jun 14, 2019 10:53 AM)doon Wrote: [\[CITE\]](#) Can you show me proof of giving someone 20k viewers?

Can do it for a trusted and serious buyer, if that is you please PM me and we can talk more.

Wick. - June 15, 2019, 1:54 pm

Any video of the bot working?

INCREDIBLE - June 17, 2019, 1:09 am

Instead of selling. why don't you offer the service considering \$1k is the hefty amount to purchase something like this with no guarantee if twitch patched it anytime soon.

Change - June 17, 2019, 1:23 am

^^ what he said, honestly i wouldn't pay 1k for a bot even if its worth it.

id definetely sell the service tho

r00tkit1 - June 17, 2019, 2:13 am

Nice to hear. I'd sell the service to send viewers instead of the source.

redpanda139 - June 17, 2019, 6:43 pm

Still looking for buyers. Please comment if interested and we can talk more :)

redpanda139 - June 22, 2019, 8:04 pm

Still looking :) available on discord now!

cadisyeonin - June 23, 2019, 2:01 am

maybe you should lower the price.

redpanda139 - June 23, 2019, 10:00 am

(Jun 23, 2019 02:01 AM)cadisyeonin Wrote: [\[CITE\]](#) maybe you should lower the price.

People are hesitant to buy for a large price... lowering to \$400 now! Please contact me if interested

GainsForDays - June 23, 2019, 10:24 am

Sending a HEAD request is worth 400\$?

Lmfao.

What proxy pool do you use?

most people on "hackforums" don't know how to code that shit and i don't either so we buy

overpriced things like this

(Jun 23, 2019 10:25 AM)12:00 AM Wrote: [\[CITE\]](#) most people on "hackforums" don't know how to code that shit and i don't either so we buy overpriced things like this 50 hours my ass, if he is a newbie coder, maybe.

Takes 2-3 hours tops.

Literary grabbing a JSON string, using it on a specific API + sending HEAD request as keep alive param. (Every X seconds)

Hard? Nope.

Worth 400\$ with no GUI? Nope.

Look at the market currently, for 10\$ you can get account creator + view bot + follow bot +cracker and a lot more.

Anyways good luck.

Maybe if it is around \$100-\$150 someone will buy. I don't think it's a super complicated shit.

Oh, and i think this guys bot bypasses twitch protection cause twitch patched certain public scripts for the viewbot. If you could do any better then i would gladly pay you for cheaper.

There is no protection that was changed on twitch side (View bot wise).

Same method, same shit since 2013. (Live viewer crap was used back then).

Just pay 10\$ a week on StreamerTool instead of paying this trash amount.

That bot has account creator + view bot + follow bot and a lot more.

I like how he ignored my statement, his shit is not unique, nothing new, same crap.

The only thing that matters on view bot is proxies,proxies proxies!

My bot is very unique, many more features than any bot I've seen on the market with better performance too. I ignored your comment because you have negative rep ?

Show me a bot that has 20k viewers on a single low powered VPS and I will believe you :)

Still looking for buyers! The video is uploaded unedited (7 minutes long) for 20k viewer proof: <https://vimeo.com/342643847> pw: "redpanda". Hit me up if interested!

StreamerTool is also a trash program that does not work so don't try to make out or promote StreamerTool like it actually delivers anything. Even with "good" proxies and cracked accounts to try to use with tool you end up with say 10K accounts, only say 20 are alive and even then the tool doesn't deliver anything with say those 20 live accounts, it just comes up with constant errors lol.

The only tools right now that are actually real and work are some private no longer released tools.

And the whole Twitch service industry as a whole is full of scammers always exit scamming or pretending their shitty fake programs work always pushing a bunch of excuses.

Clearly you haven't used any of the recent updates. The software has 200+ customers.

Don't be mad just because it broke the market.

It has the biggest amount of features on the market ATM.

"Private" my ass. If you wanna keep paying 100\$ for a simple twitch cracker, go ahead nerd, all this console programs are piece of shit NET cancer.

Only program that wasn't cracked yet is StreamerTool.

All other "Private" shit was raped on the first day.
