Camgirl Method with Scripts

Camgirl Method

The camgirl method is an ewhoring method where you sell access to a website you own where a livestream of your ewhore is playing 24/7. Personally, my site is free and I am running popads to get more of an autopiloted revenue, but you guys can sell access to the stream pay per view style as well.

Setup

Download the source from below, and then insert your video file into the templates folder, make sure it's named "stream.mp4". Then you need to find hosting, personally I use heroku, it's free and the scripts are made to work with them. Setting up heroku should be pretty self explanatory but PM me if you need help.

[Scripts](#) | [Virus Total](#) | [Heroku](#)

You are also going to need to get traffic to the site. his is where youre going to need to get creative, personally I just have a message that I copy in paste into porn comments lmao. (surprisingly actually drives decent traffic)

If you have any questions or need any help, PM me or leave it below for others to see and help. Good luck!

Which ad network do you use for pop ads? And how much do you get paid? Maybe I should switch from chaturbate white label to this

i just have it set to allow and adult content or gambling in the ads if thats what you mean. also it depends on the day and how much effort you put into getting traffic. one day i got tens of thousands because i said i was hosting a "one time freemium event" or some shit like that and made around \$20. i'd recommend using bots to advertise the site though as thats what i do, and i make a couple bucks a day autopilot. i also switch the video every day.

On my end says the mega link is invalid. I also use popads for adult offers you need a budget of 50\$ -100\$ a day to make money though. There is a really good thread on that huge black hat forum for info on pop traffic. (dont wana get banned for saying it)

I promote anything with free trial. These days though I just buy traffic to try and grow legit sites.

So you mean affiliate offers?

fallengod - June 14, 2019, 5:36 am

Thank you so much for this mate!
